Grain: World Markets and Trade

Minor Wheat Exporters Expand Sales and Increase Competition

Million metric tons

Sales by a number of relatively small wheat exporters in 2001/02 are forecast to nearly double to 9 million tons because of better crops and, in the case of India, large stocks. With relatively low costs of production, these supplies will be competitively priced and generally considered to be poorer quality.

With those additional supplies of low-cost wheat available to the world market, traditional exporters of both wheat and feedgrains will face intensified competition. The projected 4 million ton increase in exports by these minor exporters will exceed the expansion in world imports. In addition, these countries are expected to import 1.5 million tons less than the previous year.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.

SITUATION AND OUTLOOK: COMMENTARY AND CURRENT DATA

WORLD WHEAT SITUATION AND OUTLOOK

World wheat trade in 2001/02 is forecast to be 107.7 million tons, up 3.5 million tons from 2000/01. Global production is forecast down as smaller crops in the United States, EU, and China more than offset increases in Eastern Europe, FSU, and North Africa. Consumption is expected to remain well above production for the third consecutive year. Consequently, global stocks are forecast to fall 24 million tons to their lowest level in 19 years. Though the top five exporters' stocks are expected to fall more than 15 %, they are still near the 10- year average which would tend to dampen any price strengthening caused by smaller crops.

In early 2001/02, export quotes for #2 HRW FOB Gulf are down \$5 to \$140/MT from a month earlier. Expected global ending stocks fell by 7.3 million tons from last month mainly due to a stocks drawdown in China resulting from a lower than expected crop. Reduced stocks and a small increase in global consumption, is forecast to result in a 2% lower global stocks-to-use ratio to 22.3%. World wheat trade in 2001/02 is forecast nearly identical to last month.

2001/2002 Trade Changes

Selected Exporters

- ◆ **Argentina** up 500,000 tons to 13 million due to higher crop prospects.
- ◆ **Australia** down 500,000 tons to 17.5 million because of lower expected production.
- ◆ **Canada** down 500,000 tons due to decreased crop prospects.
- ◆ **Kazakhstan** down 0.5 million tons to 3.0 million due to increased competition in the region.
- ◆ **Syria** up 200,000 tons because of a larger expected crop and strong demand from neighboring countries.
- ◆ **Turkey** down 500,000 tons to 500,000 due to lower forecast production.
- ◆ **Ukraine** up 500,000 to 2.5 million because of improved crop prospects.
- ◆ **United States** up 0.5 million tons to 27.5 million due to less competition resulting from smaller crops among some leading exporters.

Selected Importers

- ◆ **China** up 1 million tons to 2 million with prospects for a smaller crop as a result of drought in key producing areas.
- ◆ **Romania** down 300,000 tons to 200,000 due to better crop prospects.
- ◆ **Turkey** up 100,000 tons to 1 million because of a lower expected crop. Despite a significant drop in production, imports will be limited by Turkey's weak currency.

2000/2001 Trade Changes

Selected Exporters

- ◆ **Argentina** down 500,000 tons to 11.5 million due to a slower export pace.
- ◆ **China** up 200,000 tons to 700,000 due to increased shipments of feed quality wheat to East and Southeast Asian destinations.
- ◆ **United States** down 1 million tons to 29 million because of a lagging export pace.

Selected Importers

- ◆ **Chile** down 150,000 tons to 500,000 because of reduced purchases to date.
- ◆ **Egypt** down 400,000 tons to 5.8 million because of a lagging import pace.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

WORLD RICE SITUATION AND OUTLOOK

Global rice trade for 2001 is projected at 22.2 million tons, down nearly 600,000 tons from the previous year. Global production (paddy basis) is forecast down 17.2 million tons to 590.1 million. Ending stocks are projected to decline 4.8 million tons to 134.4 million. Consumption, however, is projected to increase 2.4 million tons to 401.4 million.

While high global stocks and low import demand hinder growth in trade, many of the major exporting countries are behind their typical export pace. Global price quotes are steady to higher; the four week average for Thai 100B and Viet 5% is \$172/ton and \$153/ton, respectively.

Export price quotes for U.S. long grain grade #2/4 percent remain at \$276 per ton (FAS), US Gulf sacked, while medium grain #1/4 California rice holds at \$190 per ton, ex-spout Sacramento port.

Trade Changes in 2001

Selected Exporters

- ◆ **China** exports down 700,000 tons to 1.8 million due to a slower than expected pace to date.
- ◆ **Pakistan** up 250,000 tons to 2.25 million based on an increased pace to date.

Selected Importers

- ◆ **Indonesia** imports down 500,000 tons to 1.3 million based on a slower than expected pace to date and current government import policies.
- ◆ **Iran** down 400,000 tons to 1.0 million based on pace to date.
- ◆ **Iraq** down 300,000 tons to 1.0 million based on pace to date.

WORLD COARSE GRAINS SITUATION AND OUTLOOK

World coarse grain trade for 2001/02 is projected down nearly 1.5 million tons to 99 million tons, due to a production rebound from five year lows as bigger crops are anticipated in most regions of the world except the former Soviet Union. Global consumption is expected to continue to outpace production and carryout stocks are forecast to fall almost 15 mmt. US corn, China corn, and EU barley are forecast to comprise nearly two-thirds of world coarse grain stocks.

Global corn trade is projected to be down marginally from a year earlier at 71 million tons. US exports are projected to increase 4.5 million tons from 2000/01 levels, largely because of reduced competition from China. Although the US corn crop is expected to be smaller than last year and consumption is expected to increase, larger carryin stocks will result in ending stocks only declining marginally. Chinese corn production is forecast to rebound partially from the 2000/01 drought-reduced level but with consumption forecast up to record levels, stocks will continue to fall.

World barley trade is forecast to remain robust as Mid Eastern and North African demand continues strong. The EU will remain the largest supplier, although Russia, Ukraine and Canada are forecast to increase exports.

2001/02 Trade Changes

Selected Exporters

- ◆ **United States corn** up 1.5 million tons to 51 million in response to lessening competition.
- ◆ **China corn** down 2 million tons to 3 million due to a smaller expected crop and strong prices.
- ◆ **Ukraine barley** up 500,000 tons to 1 million due to a larger anticipated crop.
- ◆ **Australia barley** down 300,000 tons to 3.6 million, **Canadian barley** down 200,000 tons to 2.3 million, and **EU barley** down 500,000 tons to 8.5 million because of intensifying low cost competition in a shrinking market.

Selected Importers

- ◆ **Iran corn** down 400,000 tons to 700,000 tons due to smaller than expected current year import program.
- ◆ **Morocco barley** down 200,000 tons to 800,000 tons and **Syria barley** down 300,000 tons to 150,000 tons in response to larger anticipated crops.

2000/01 Trade Changes

Selected Exporters

- ◆ **United States corn** down 1 million tons to 46.5 million due to a slow sales and shipment pace to date.
- ◆ **South Africa corn** up 500,000 tons 1.6 million based on a strong sales pace to date.
- ◆ **United States sorghum** up 300,000 tons to 5.6 million supported by continuing strong sales to Mexico.

Selected Importers

- ◆ **Canada corn** up 100,000 tons to 1.4 million supported by a strong pace of imports.
- ◆ **Iran corn** down 400,000 tons to 700,000 tons due to a slow pace of imports to date.
- ◆ **Mexico sorghum** up by 300,000 tons to 4.1 million due to continued strong demand by feedmillers.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade year statistics since 1979/80 exclude intra-EU trade.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

OTHER NOTES

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Current and historical data on the European Union in this issue refers to the EU-15.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

This circular was prepared by the Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attaches and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 05-01 May 01. For further details on world grain production see World Agricultural Production, Foreign Agricultural Service Circular WAP 06-01 June 2001.
