Grain: World Markets and Trade

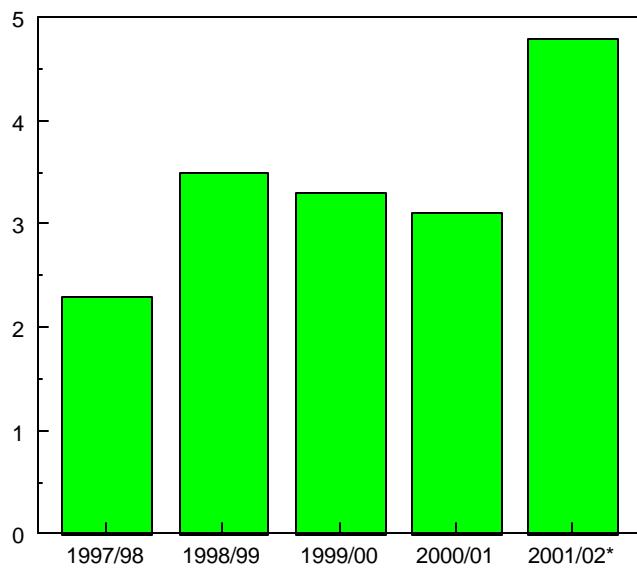

The EU Grain Market: The Great Paradox

Wheat Trade

(Million Metric Tons)

Rye Intervention Stocks **

* forecast

** EU Commission data

The EU is currently importing unusually large quantities of wheat, barley and rye, despite its normal status as one of the world's largest exporters of these grains. High domestic prices, largely stemming from a sharply reduced crop and strong demand, combined with import duties falling to zero, have resulted in significantly increased imports. As a result, import licenses for wheat in the first six months of the year have exceeded export licenses. While small compared with wheat, barley imports are expected to more than double over last year. The EU is even quickly becoming one of the world's largest importers of rye, despite its continuing status as the world's largest exporter. The imports of rye and other feed grains are particularly paradoxical in view of the fact that the EU currently holds nearly 5 million tons of rye intervention stocks.

SITUATION AND OUTLOOK: COMMENTARY AND CURRENT DATA

WORLD WHEAT SITUATION AND OUTLOOK

World wheat trade in 2001/02 is forecast to be 107.5 million tons, up 4.2 million tons from 2000/01. Global production is forecast down 4.2 million tons and is expected to remain below consumption for the third consecutive year. Global stocks are forecast down 11.9 million tons from last year to the lowest level since 1996/97.

In early December, export quotes for #2 HRW FOB Gulf averaged \$125/MT, down \$3 from last month. Global production is nearly unchanged from last month with a smaller crop in Argentina and slightly lower production in the EU and former Soviet Union mostly offset by a larger Australian crop. Global consumption is forecast up more than 1.6 million tons while ending stocks are forecast down 1.1 million tons. Global wheat trade in 2001/02 is forecast nearly identical to last month. Larger exports from Australia and the Ukraine are countered by smaller Argentine and EU exports. Expected imports are slightly lower in a few countries while imports by the EU are forecast up 1 million tons.

2001/2002 Trade Changes

Selected Exporters

- , **Argentina** down 1 million tons to 11.0 million based on lower than expected yields in southern producing areas resulting in a smaller crop.
- , **Australia** up 1 million tons to 18.5 million due to a larger than expected crop and less competition.
- , **EU** down 500,000 tons to 11.5 million based on the slow pace of export licenses, as the Commission continues to refuse bids by traders for subsidies needed to compete with cheaper supplies out of the Black Sea.
- , **Ukraine** exports up 500,000 tons to 4.5 million due to the strong pace of shipments to date, especially to the EU.

Selected Importers

-
- , EU up 1 million tons based on the high level of duty-free import licences and continued high domestic prices, both of which favor relatively cheap imports.
 - , **Indonesia** down 200,000 tons to 4.0 million because of reduced credit availability.
 - , **Turkey** down 200,000 tons to 1 million due to lower than expected purchases to date.

NOTES: Footnotes appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

WORLD RICE SITUATION AND OUTLOOK

Global rice trade for 2002 is projected at 22.5 million tons, unchanged from a month ago but down 1.7 million tons from revised 2001. Global ending stocks in 2001/02 are forecast to decline to 125.9 million tons as slightly higher world consumption exceeds declining world production (milled basis).

Price quotes in Thailand and Vietnam have remained firm over the past month, but are beginning to show signs of weakening in face of limited demand and the anticipation of expected lower prices by spring as 2002 crops are harvested in Asia in the next couple of months.

Export price quotes for U.S. long grain grade #2/4 percent have fallen to \$204 per ton (FAS) for the past few weeks, while quotes for medium grain #1/4 California rice are steady at \$270 per ton (ex-spout).

Trade Changes in 2001

Selected Exporters

- , **Argentina** up 75,000 tons to 350,000 based on stronger than expected exports in the last quarter.
- , **Burma** up 168,000 tons to 668,000 due to strong last quarter shipments and final trade data.
- , **China** up 159,000 tons to 1.859 million based on large shipments during the month of December and final trade data.
- , **Egypt** up 75,000 tons to 725,000 based on increased export pace during last quarter.

Selected Importers

- , **Cote d'Ivoire** up 75,000 tons to 700,000 due to larger than expected imports and demand for competitively priced rice.

WORLD COARSE GRAINS SITUATION AND OUTLOOK

World coarse grain trade for 2001/02 is projected down more than 2.7 million tons from the previous year to 99.8 million. Global consumption is expected to continue to outpace production and carryout stocks are forecast to fall by more than 23 million tons. US corn, China corn, and EU barley are forecast to account for nearly two-thirds of world coarse grain stocks. With this month's forecast, EU barley imports are expected to reach the highest levels in over a decade as competitively priced Black Sea supplies continue to enter duty-free.

Global corn trade is projected down nearly 3.4 million tons from a year earlier to 72.3 million. US exports are forecast to increase almost 1.9 million tons from 2000/01, largely due to reduced competition. Smaller US carryout stocks will result from a smaller crop and larger exports.

2001/02 Trade Changes

Selected Exporters

- , **Turkey barley** up 450,000 tons to 500,000 because of recent sales and pending export tenders.
- , **Kazakhstan barley** down 100,000 tons to 450,000 tons based on strong competition from Ukraine and Russia.
- , **Ukraine oats** are forecast up 50,000 tons to 50,000 based on recent sales.

Selected Importers

- , **Chile corn** up 200,000 tons to 1.4 million due to rising consumption.
- , **Dominican Republic corn** down 200,000 to 1 million tons as a result of stagnant demand.
- , **Egypt corn** and **Indonesia corn** each down 200,000 tons to 5.1 million and 1.3 million respectively because of weaker demand than anticipated.
- , **Philippines corn** down 200,000 to 400,000 tons based on flat consumption.
- , **EU barley** up 300,000 tons to 500,000 tons based on the strong pace of duty-free import licenses and relatively high domestic prices.
- , **EU rye** up 100,000 tons to 100,000 because duty-free purchases from Ukraine and/or Russia are cheaper than German rye.

2000/01 Trade Changes

Selected Exporters

- , **Argentina corn** down more than 170,000 to 12.2 million tons based on end-of-year data.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units causes some discrepancies with World Board Supply and Demand Estimates.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption. Trade year statistics since 1979/80 exclude intra-EU trade.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

- 1) Includes Canada, Mexico, and the United States.
- 2) Includes Central America, the Caribbean, and South America.
- 3) Includes Azores, Cyprus, Iceland, Malta & Gozo, Norway, and Switzerland.
- 4) Includes Albania, Bulgaria, Czech Republic, Hungary, Poland, Romania, Slovakia, and former Yugoslavia.
- 5) Includes Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen.
- 6) Includes Algeria, Egypt, Libya, Morocco, and Tunisia.
- 7) Includes all other African countries except North Africa.
- 8) Includes Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, and Sri Lanka.
- 9) Includes all other Asian countries except South Asia.
- 10) Includes Australia, Fiji, New Zealand, and Papua New Guinea.

OTHER NOTES

Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Current and historical data on the European Union in this issue refers to the EU-15.

Consumption statistics reflect total utilization, including food, feed, seed, and differences in marketing year imports and marketing year exports.

This circular was prepared by the Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attaches and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 01-02 January 2002. For further details on world grain production see World Agricultural Production, Foreign Agricultural Service Circular WAP 02-02 February 2002.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is:
