Grain: World Markets and Trade

Shrinking Stocks Constrain Indian Exports

India's wheat and rice exports are expected to fall this year as tightening stocks limit exportable supplies. Grain exports peaked 2 years ago after a string of large crops, and subsequent swelling stocks, led the government to encourage rice and wheat exports. Aggressive export programs, coupled with smaller production in recent years, cut grain carryin stocks by over 60 percent. Tighter supplies led the government in August 2003 to ban the allocation of subsidized rice and wheat for export. For wheat, large volumes of sales concluded before the ban have meant that the resulting slowdown in shipments has only recently started to be realized. This is opening greater opportunities for other suppliers in Asian, East African, and Persian Gulf markets. For rice, the export slowdown began late last year and is expected to continue over the next year, particularly given the irregular performance of the 2004 monsoon. Reduced Indian shipments will boost other Asian sales into Africa and parboiled markets. However, this may be offset by import demand by Bangladesh because of severe flooding.

INTERNATIONAL MARKET ANALYSIS

Feed-Quality Wheat Trade Recovers

Recovering crops throughout Europe and the Former Soviet Union will boost feed consumption of wheat and trade in feed-quality wheat this year, although levels will likely remain below those reached 2 years ago.

Global Situation: This year, feed consumption of wheat will rebound as crops in the EU-25, the Balkan region, Russia, and Ukraine recover from last year's dismal harvests. Feed use of wheat accounts for over a sixth of total world consumption, often in excess of 100 million tons, and is concentrated in key producers--with Europe and the Former Soviet Union accounting for most of the world total. Nearly all feed-quality wheat is fed domestically, with normally less than 5 percent traded (although this peaked near 10 percent in 02/03). Typically, the amount of trade has been a function of weather-damaged crops in Canada and Australia, as well as subsidized EU exports of low-quality wheat. However, with the emergence of Russia, Ukraine, and Eastern European countries like Bulgaria as wheat exporters, their production has become the primary determinant of feed-quality wheat trade levels.

Trade in feed-quality wheat will climb from last year's low level as larger Black Sea crops allow for greater exports, although these could be partially offset by reduced exports from key Asian suppliers, namely China and India. The level of trade, however, will ultimately depend on the final quality of Black Sea countries' crops, their tendency to blend lower quality wheats for domestic use, their governments' export policies, as well as the price of wheat vis-à-vis other feed grains.

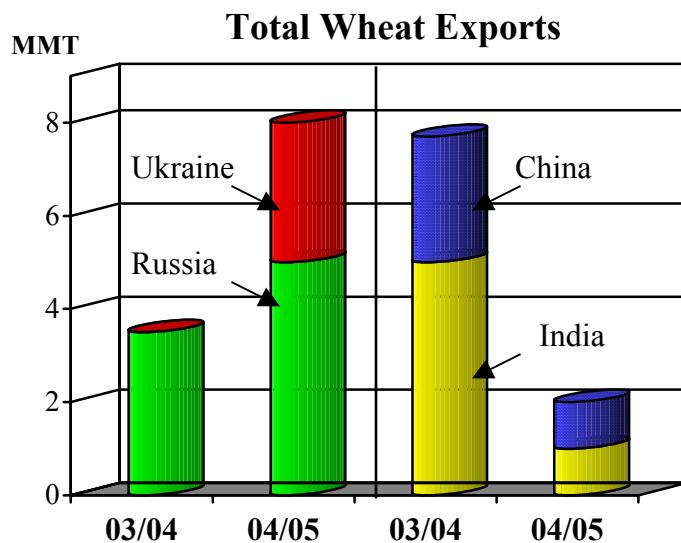

Selected Exporters

Black Sea Region: With production recovering throughout Eastern Europe, Ukraine and Russia, this region should return as the primary source of feed-quality wheat this year. Whereas the EU will remain a major feed-quality wheat market, imports will be capped under a tariff-rate quota at 2.4 million tons, far below previous levels. Therefore Black Sea wheat will also likely go to feed markets in Asia, or be imported by countries to be blended. Sales have already been reported to southern EU markets, Philippines, and South Korea with some contracts at prices nearly \$20 below the landed price of corn.

India: Exports of cheap feed-quality wheat will shrink this year as total wheat exports fall from 5.0 million tons to just 1.0 million. With greatly reduced stocks, it is unlikely that the government will subsidize exports, thereby making Indian supplies largely uncompetitive in the world market. A string of large harvests, with subsequent swelling stocks, had allowed India to become a net exporter of wheat, supplying milling and feed-quality wheat to nearby Asian

markets. Last year, for instance, the Philippines imported over a million tons of Indian wheat, much of which was subsequently fed.

China: Following a year of record wheat exports, China is expected to also fade as a source of feed-quality wheat this year. Shipments have already slowed considerably and China has returned as a net wheat importer. Although production is up this year, stocks will continue to decline, reducing exports. China had emerged as an important supplier of feed-quality wheat as the government rotated stocks, some of which had been held for many years. Feed-quality wheat exports went primarily to South Korea and the Philippines, and during a few months last year, China actually exported more wheat than corn.

Selected Importers

EU-25: The EU is the world's largest consistent purchaser of feed-quality wheat. Imports are expected to expand this year, even with a record domestic crop, because of abundant supplies of inexpensive wheat from the Black Sea region, which competes effectively with French and British low quality wheats into the southern EU. However, in contrast to 2002/03 when total wheat imports from those countries approached 9 million tons, feed-quality wheat imports are now capped by a TRQ at 2.4 million tons.

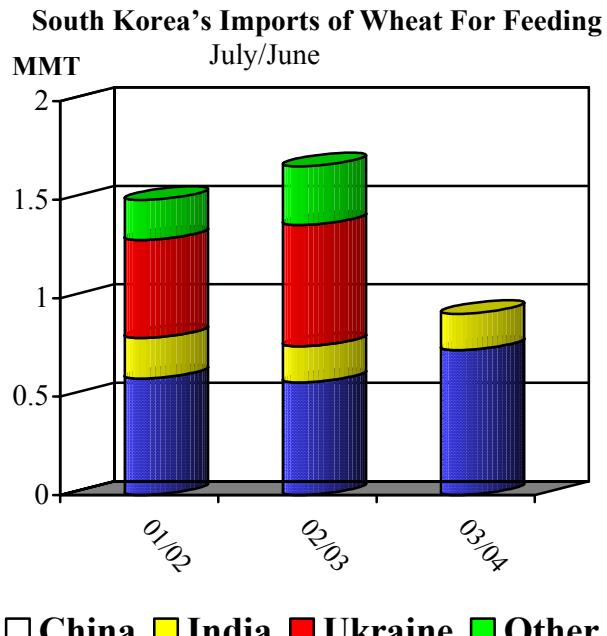

Israel: Wheat imports for feed should expand this year with the greater availability of nearby Black Sea supplies. Israeli feed compounders regularly switch between coarse grains and feed-quality wheat depending on price and availability. The dearth of Black Sea wheat supplies last year caused imports to plummet, and consequently corn imports jumped to record levels while sorghum imports reached a 5-year high. As feed consumption of wheat is expected to more than triple (from 200,000 to 750,000 tons) this year, corn and sorghum imports will consequently drop.

South Korea: Imports of feed-quality wheat are expected to rebound this year with most expected to come from Ukraine and other European suppliers. This will push feed consumption of wheat up from 920,000 tons to an estimated 1.4 million. While last year the absence of Black Sea supplies caused wheat feeding to drop by nearly half and corn imports to reach record levels, more feed-quality wheat will likely cut corn purchases this year. Total imports of wheat for feeding could still remain below past levels, however, due to reduced supplies from China and India, which last year supplied all of South Korea's feed-quality wheat imports.

Philippines: This year is expected to be the first time the Philippines has become a significant importer of Black Sea wheat.

While in 2002/03 imports of wheat for feeding came primarily from India, and from China last year, the expected retreat of these suppliers this year will force purchasers to look to the greater supplies in Europe and the Former Soviet Union. Feed consumption of wheat annually stands around a million tons, all of which is imported, with volume largely depending on the size of the domestic corn crop and world feed-quality wheat availability. In order to protect the domestic corn producers, the government has levied a 35 percent tariff on corn imports, while the tariff on wheat for feed is only 7 percent and wheat for milling only 3 percent.

WORLD MARKETS AND TRADE: COMMENTARY AND CURRENT DATA

WHEAT: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

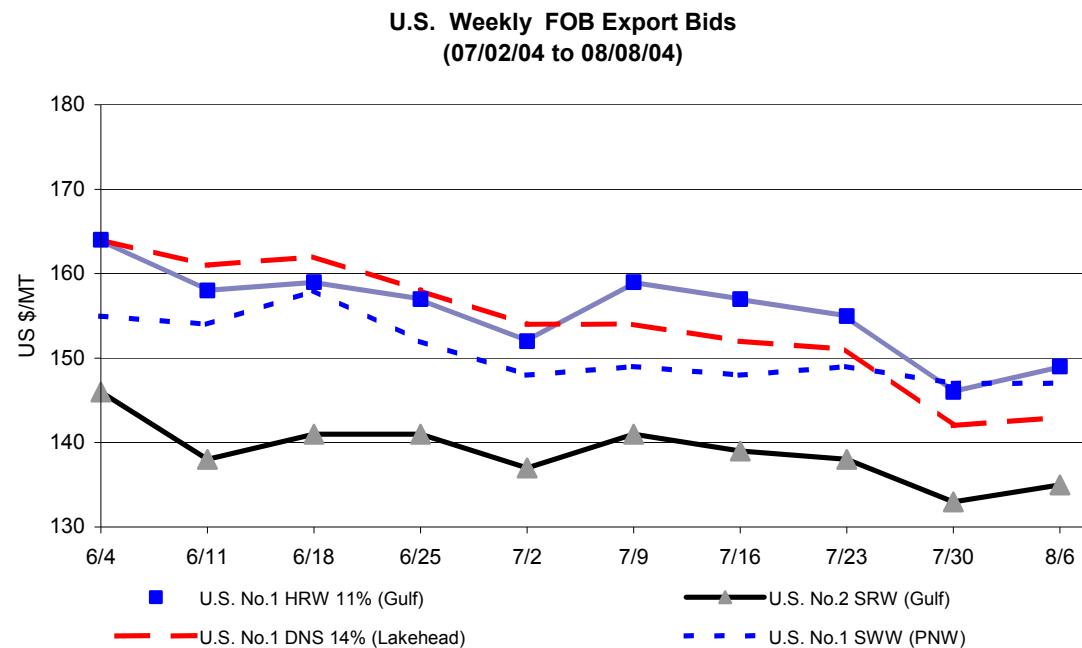

Pakistan Returns As Net Importer: Pakistan's state-run Trading Corporation recently purchased 484,700 tons of wheat from the United States, Australia, and for the first time, Russia. These purchases are against the 1.0 million tons that the government earlier announced would be imported in order to rebuild strategic stocks, and another 500,000 ton tender is expected in the next few months. This marketing year, Pakistan will be a net importer for the first time since 1999/00. Pakistan's stocks have fallen to very low levels, due in part to strong exports 2 years ago, which went primarily to Africa. With production expected to fall below consumption this year, imports have become necessary.

PRICES:

Domestic: During early July, prices made a short-lived rally on quality concerns, but soon descended on increasing competition from the Black Sea Region and prospects of a good spring crop. Prices took a tumble at the end of July as competition became stiffer and prospects took shape for a record U.S. corn crop. Prices rallied slightly in the first week of August, due to improved exports.

For the week ending Aug 8, average HRW and SRW prices were \$3 a ton lower than those in the first week of July. HRS prices lost \$11 a ton while SWW ended the month with a loss of \$1 a ton.

TRADE CHANGES IN 2004/2005

Selected Exporters

- **Bulgaria** up 300,000 tons to 700,000 with higher expected production due to recovering yields.
- **Canada** up 500,000 tons to 16.0 million with better crop prospects.
- **Russia** up 500,000 tons to 5.0 million due to better than expected yields.
- **Ukraine** up 1.0 million tons to 3.0 million with the crop expected to more than quadruple last year's record low level.
- **United States** down 500,000 tons to 25.5 million as larger crops in Europe, the Black Sea region, and Canada result in intensified global competition.

Selected Importers

- **Russia** up 500,000 tons to 1.5 million tons as greater high-quality imports are expected from Kazakhstan.

-
- **South Korea** up 400,000 tons to 3.8 million because of higher expected imports of feed-quality wheat from the Black Sea region.
 - **Tunisia** down 200,000 tons to 1.0 million as another year of good production limits durum and soft wheat import requirements.

TRADE CHANGES IN 2003/2004

Selected Exporters

- **Australia** up nearly 600,000 tons to 15.096 million with year-end trade data.
- **Kazakhstan** down 500,000 tons to 5.2 million as exports slowed considerably during the second half of the year.
- **EU-25** up 500,000 tons to 10.3 million due to a strong pace of shipments late in the year.

Selected Importers

- **Algeria** up 300,000 tons to 3.6 million caused by stronger-than-expected late-season imports. A similar increase was made to the 2004/05 estimate.
- **Cuba** down 150,000 tons to 850,000 due to a slow pace of imports.
- **Indonesia** up 300,000 tons to 4.4 million with a faster-than-expected import pace. A similar increase was made to the 2004/05 estimate.
- **Iran** down 200,000 tons to 300,000. Imports have largely ceased during the last 6 months.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

RICE: WORLD MARKETS AND TRADE

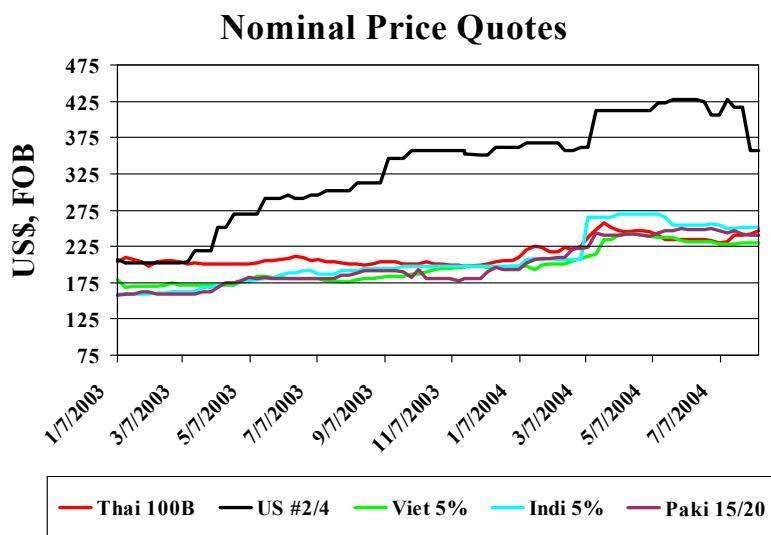

MONTHLY HIGHLIGHTS:

China Turns Inward? In the first quarter of 2004, Chinese exports followed a normal seasonal pattern. However, in the second quarter, locality problems and sharp increases in domestic prices prompted China to virtually halt exports and to simultaneously purchase regular white rice from neighboring exporters, Thailand and Vietnam. Since the sudden burst in March, imports have tapered off. Still, January-June 2004 import statistics show that China has imported approximately 600,000 tons of which only 15 percent is fragrant Thai jasmine rice. Meanwhile, exports have not picked up, perhaps in an attempt to prevent another run-up in prices. It seems that China has turned its focus to supplying the domestic market rather than the international market. Additionally, there has been significant area-response to the new government grain policy to expand production, which includes subsidized seed and fertilizer, as well as direct payments.

PRICES:

International: World prices surged this month as demand for parboiled and white rice drove prices for Thai 100B up \$16, with quotes currently at \$246 per ton, FOB. Viet prices have also strengthened despite the government policy limiting the signing of new contracts. Viet 5% is currently quoted at \$232 per ton, FOB, up \$4 from last month. India's 5% is down \$3 at \$252 per ton, FOB.

Domestic: U.S. #2/4 long grain milled rice is currently quoted at \$346 per ton, FOB, \$60 less than last month. The spread between U.S. and Thai prices has dramatically narrowed to \$100 per ton compared to \$176 last month. Prices for U.S. #1/4 medium grain milled rice from California are quoted at \$385 per ton, bulk, ex-spout Sacramento.

TRADE CHANGES IN 2005

Selected Exporters

- **United States** is dropped 200,000 tons to 3.4 million based on continued import restrictions by Turkey and less import demand in Latin America.
- **China** is down 200,000 tons to 1.0 million based on tight supplies.
- **Thailand** is boosted 500,000 tons to 8.5 million based on greater market opportunities in Africa and the Middle East.

Selected Importers

- **United States** is down 20,000 tons to 460,000 with higher supplies of medium and short grain rice.
- **Bangladesh** is raised 100,000 tons to 600,000 due to crop loss from flooding, which is expected to reduce production thereby increasing import demand.
- **Indonesia** is lowered 200,000 tons to 1.8 million because of sufficient stocks.
- Despite a larger crop forecast, **Philippines** is boosted 200,000 tons to 800,000 largely to maintain buffer stocks.

TRADE CHANGES IN 2004

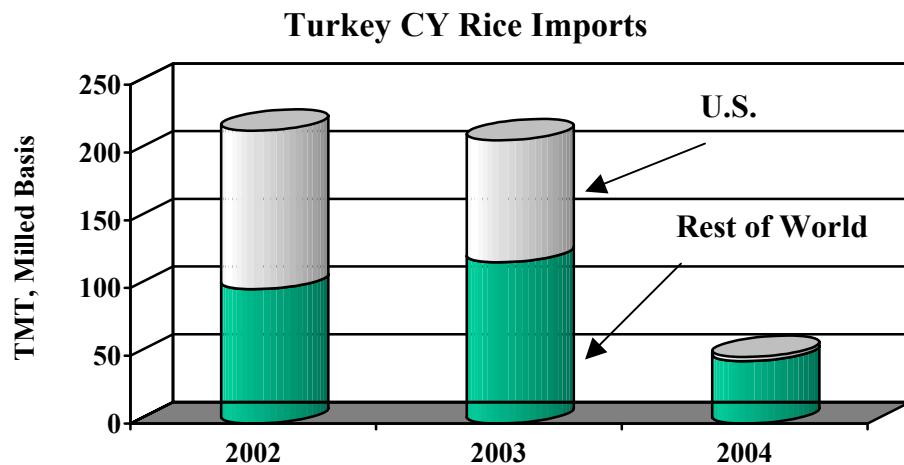

Selected Exporters

- **China** is slashed 200,000 tons to 1.0 million as exports to major African and Asian markets drop off during the second quarter.
- **India** expands 300,000 tons to 2.8 million due to stronger-than-anticipated shipments to Bangladesh and Saudi Arabia.
- **Pakistan** is reduced by 100,000 tons to 1.8 million based on a slow export pace to date.

Selected Importers

- **United States** is increased 30,000 tons to 500,000 based on stronger-than-expected medium grain imports.
- **Bangladesh** is raised 100,000 tons to 600,000 based on stronger-than-anticipated imports, mainly from India, over the first half of the year.
- **North Korea** is up 200,000 tons to 500,000 with increased food aid donations from Japan, Russia, and South Korea.
- **Nigeria** drops 100,000 tons to 1.3 million as a result of the slow import pace to date.
- **Philippines** is increased 100,000 tons to 1.0 million based on current purchases from the National Food Authority (NFA). NFA recently announced it would not purchase rice for the remainder of the year.

Turkey is cut 50,000 tons to 150,000 because of the slow pace to date due to continued restrictions on imports. In August 2003, the Turkish Ministry of Agriculture stopped issuing import licenses for rice due to large domestic supplies. In April 2004, the government replaced the outright ban on imports with an absorption agreement, which requires importers to purchase domestic rice in exchange for an import license for an equal amount.

All other data are reported using marketing years.

COARSE GRAINS: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Corn: Although U.S. exports have recovered somewhat in recent weeks from their earlier lassitude, total shipments to date are not on pace to meet the previous 50-million-ton forecast. In particular, exports to Canada and Mexico have slowed. With the approaching harvest of a record crop and anticipated lower prices, some outstanding sales could be switched to later delivery, further depressing the current year's export program.

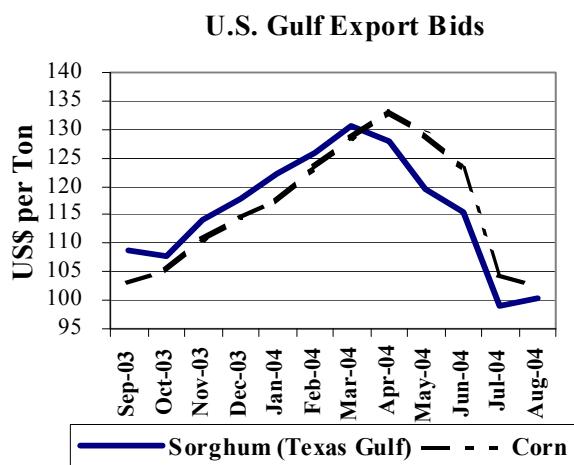

Barley: Ukraine's largest harvest in 10 years is expected to propel the country to become the world's second largest exporter after Australia. Ukrainian barley is expected to dominate the Middle East, a key feed barley market traditionally covered by the EU. Without subsidies, EU exports cannot compete with the cheaper Black Sea supplies.

PRICES:

Domestic: Early August export bids for #2 yellow corn averaged \$103/MT, down \$2 from July and about the same as last September's price. Slight weather concerns and improved exports have reversed the slide in recent weeks.

Early August export bids for #2 yellow sorghum (Texas Gulf) averaged about \$101/MT, up nearly \$2 from July but \$8 below harvest time prices from September 2003. Sorghum is at a \$2 discount to corn, versus nearly a \$6 premium last September. Price weakness caused by harvest activities in Texas

and rapidly dropping corn prices have been offset to a degree by early-season sorghum exports to Mexico.

TRADE CHANGES IN 2004/2005

Selected Exporters

- **Brazil corn** drops by 300,000 tons to 3.2 million as a smaller winter crop raises prices and reduces competitiveness.
- **Bulgaria, Romania, and Serbia corn** each increases by 200,000 tons based on improved crop prospects.
- **Canada barley** is up 300,000 tons to 2.1 million due to a larger crop.
- **Ukraine barley** expands by 500,000 tons to 2.8 million based on the largest crop in 10 years.
- **EU-25 barley** is lowered by 700,000 tons to 1.8 million in light of stronger competition from Ukraine and the current absence of export subsidies.

Selected Importers

- **South Korea corn** drops by 200,000 tons to 9.1 million on the expectation of higher purchases of feed quality wheat.
- **Russia corn** is raised by 100,000 tons to 600,000 based on higher domestic demand.

TRADE CHANGES IN 2003/2004

Selected Exporters

- **United States corn** falls 1.0 million tons to 49.0 million based on slower-than-expected shipments.
- **Brazil corn** is up 300,000 tons to 5.3 million due to a strong shipment pace in recent months.
- **Thailand corn** increases by 300,000 tons to 900,000 as a result of lower domestic consumption brought on by new cases of Avian Influenza.
- **Kazakhstan barley** is up 200,000 tons to 700,000 based on newly available trade data.
- **Canada rye** is up 50,000 tons to an 8-year high of 150,000 with strong recent shipments to the United States and Japan.

-
- **Russia rye** is down 100,000 tons to 100,000 due to weak sales pace.

Selected Importers

- **Canada corn** decreases by 200,000 tons to 1.8 million based on a slower-than-expected pace in recent months.
- **Egypt corn** drops by 200,000 tons to 4.0 million because of continued foreign exchange woes.
- **Israel corn** is up 200,000 tons to 1.5 million based on a strong pace.
- **Mexico corn** declines 200,000 tons to 6.1 million due to a weak pace.
- **Japan rye** is up 75,000 tons to 325,000 due to larger-than-expected imports from Canada.

Note: Due to large discrepancies between the timing of reported EU-25 rye exports, and reported South Korean and Japanese imports, revisions were made to the EU-25 export estimates for 2002/03 and 2003/04. The EU-25 number now reflects time of arrival in these countries.

Notes:

Trade year statistics are on a July/June year for wheat and an Oct/Sep year for coarse grains.

The Coarse Grains category includes barley, corn, millet, oats, rye, and sorghum.

Production estimates are on a clean-weight basis.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units cause some discrepancies with World Board Supply and Demand Estimates.

Notes:

Coarse grains trade data are on July/June years through 1975/76. From 1976/77 to the present, coarse grains data are on an Oct/Sept trade year. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Latin America: Central America, the Caribbean, South America.

EU: Austria, Belgium/Luxembourg, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Bulgaria, Croatia, Gibraltar, Iceland, Macedonia, Norway, Romania, Serbia and Montenegro, Switzerland, Yugoslavia.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Other Africa: all African countries except North Africa.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

EU Consolidation: The trade figures for the EU-25 for the years 1999/00 through 2002/03 are inflated by the two-way trade between the two groups (EU-15 and acceding 10). Over the past 6 years, this “intra-trade” has averaged about 700,000 tons for wheat, 350,000 tons each for corn and barley, and 150,000 tons for rye. The trade figures also include intra-trade between members of the acceding 10. From 2003/04 onward, all intra-trade has been removed.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 07-04 July 2004. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 08-04 August 2004.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
