Grain: World Markets and Trade

Global Rice Trade in 2007: Thailand to Expand Lead as World's Largest Exporter

World rice supplies are expected to be tight in 2007, but despite this ample supplies in Thailand will allow it to widen its lead as the world's largest exporter. Intervention stocks are currently at high levels and the government has signaled that it intends to reduce them by selling more for export. This will allow Thai exporters to profit from strong Philippine and Indonesian demand. Exports to the EU could also increase given the need to replace U.S. rice sales which have been effectively banned. Vietnam's exports are expected to improve, despite press reports to the contrary, as a consequence of Indonesia's increased demand. U.S. exports are forecast to slightly decline due to tighter supplies and higher prices, despite strong world demand.

Global import demand will be driven by Indonesia, where imports are forecast to triple. A weak El Nino has led to dry conditions during sowing periods, impacting area rather than yield. Other factors also contributing to the falling area include seed and fertilizer problems and to pressures from land conversion to non-agricultural uses.

Circular Modifications:

The Foreign Agricultural Service (FAS) will update its production, supply and distribution database for cotton, oilseeds, grains and pulses along with its downloadable data sets at 9 a.m. on the day the World Agricultural Supply and Demand Estimates (WASDE) report is released. It is available on the FAS website (<http://www.fas.usda.gov/psdonline/>). This circular will be released at 9:30 a.m. on the same day. This is an effort to speed up FAS information dissemination to more closely coincide with the release of the WASDE. FAS will evaluate this earlier release process to determine if it should be made permanent in 2007.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports differs from global totals shown elsewhere.

Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug).

WHEAT: WORLD MARKETS AND TRADE

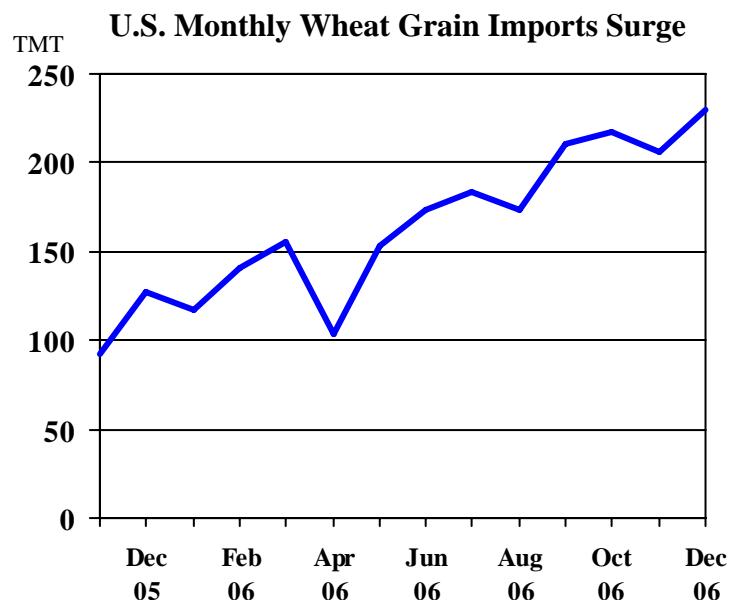

MONTHLY HIGHLIGHTS:

U.S. Imports From Canada Continue to Climb: U.S. imports this month were revised up to the highest level in 13 years. Canada has a large, better quality crop this year and imports into the U.S. are allowed to come in duty free. In recent months, Hard Red Spring and Durum wheats have primarily been imported. The United States is forecast to be a net importer of durum and products this year as production has fallen to a nearly 20-year low. Spring wheat supplies are also tight, with production down as a result of dryness in the Plains states.

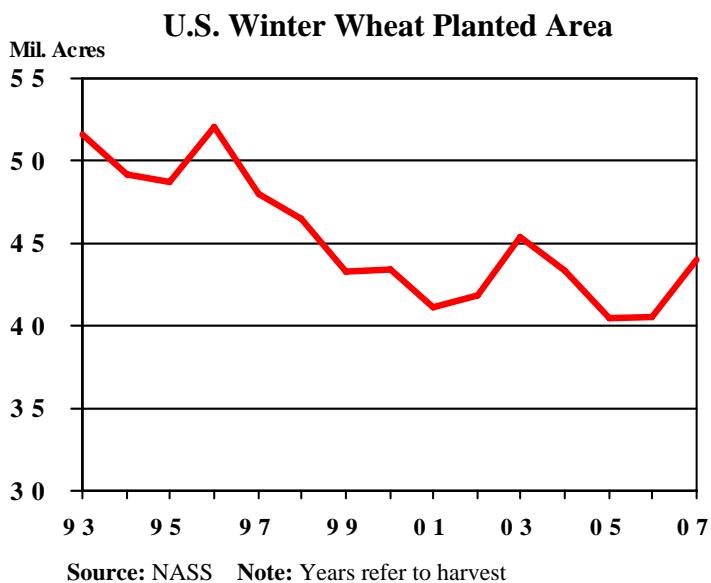

U.S. Winter Wheat Area Jumps:

The total U.S. winter wheat seeding area is expected to rise 9 percent from the previous year because of elevated prices (10-year highs). Hard Red Winter (HRW) and Soft Red Winter (SRW) are expected to rise 9 and 13 percent respectively from last year. SRW particularly had ideal planting conditions.

Australian Government Grants Two Wheat Export Permits: Agriculture Minister Peter McGauran announced on December 22, 2006 that he granted 2 permits for the export of 300,000 MT of wheat to Iraq by Wheat Australia and 500,000 MT to Indonesia by Cooperative Bulk Handling (CBH) Group, a grower owned and operated cooperative. The government stated that it chose these two because: 1) CBH Group will offer a price premium to Western Australian farmers and 2) Wheat Australia keeps the Iraqi market open for Australian wheat since Iraq will not import wheat from the Australian Wheat Board (AWB) due to its involvement in the UN Oil-for-Food scandal. Currently, supporters of the single-desk believe it was unfair to authorize these export permits because it effectively dismantles the single-desk even before consultations begin between the government and industry over marketing options. Others argue that the decision merely perpetuates the single-desk. The Australian government expects a solution to the single-desk dilemma in May 2007.

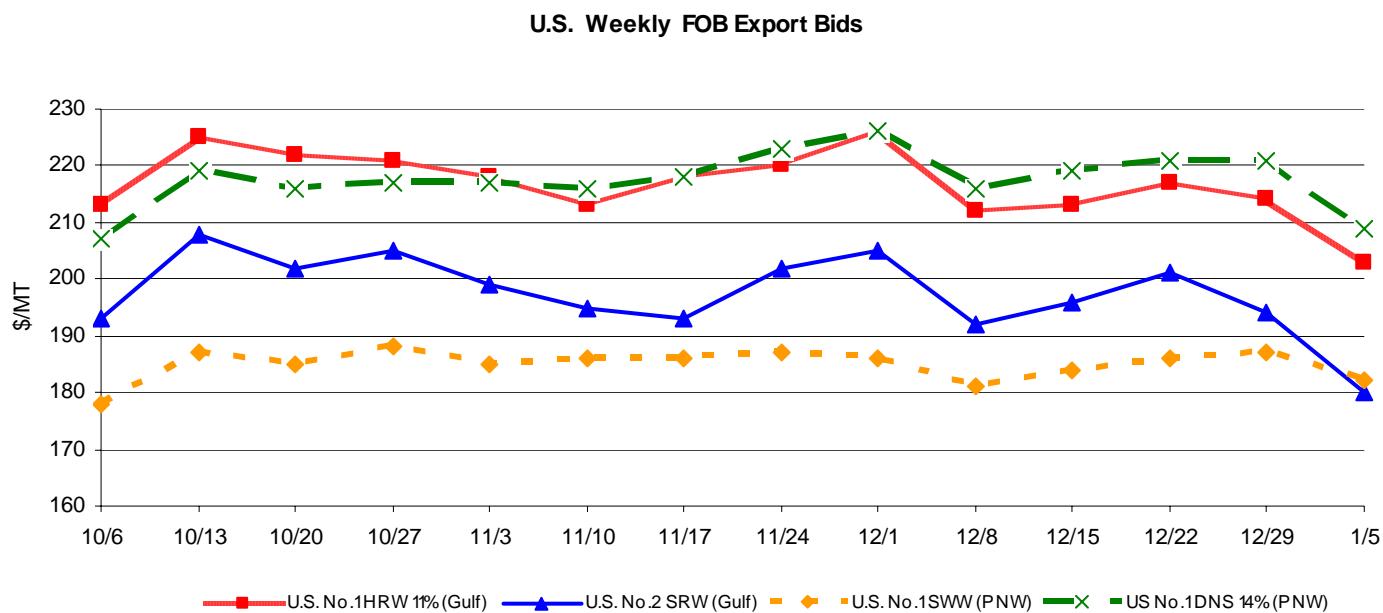

Note: November and December are estimates

Source: NASS Note: Years refer to harvest

PRICES:

Domestic: For December, wheat prices for all classes dropped during the month on very sluggish export sales and shipments as well as expectations for much larger global production in 2007. For the month, Soft Red Winter (SRW) prices fell \$25, Hard Red Winter (HRW) fell \$23, Hard Red Spring (HRS) fell \$17, and Soft White (SWW) prices fell \$4.

TRADE CHANGES IN 2006/2007

Selected Exporters

- **Argentina** is up 500,000 tons to 10.0 million on very strong old crop exports.
- **EU-25** is down 500,000 ton to 15.5 million on tight supplies and sluggish exports licenses which are 1.5 million tons (20%) behind last year's pace to date.
- **Russia** is up 1.0 million tons to 9.5 million on higher production and very strong pace of exports to date.
- **Ukraine** is down 700,000 tons to 2.8 million on the imposition of government export quotas.
- **United States** is down 1.0 million tons to 24.5 million as high prices have resulted in laggard export sales and shipments to date.

Selected Importers

- **Iraq** is down 500,000 tons to 3.0 million on sluggish buying patterns.
- **Pakistan** is down 400,000 tons to 200,000 becoming a net exporter as a result of sizeable domestic supplies.
- **United States** is up 300,000 tons to 3.1 million tons as a result of very large shipments from Canada.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

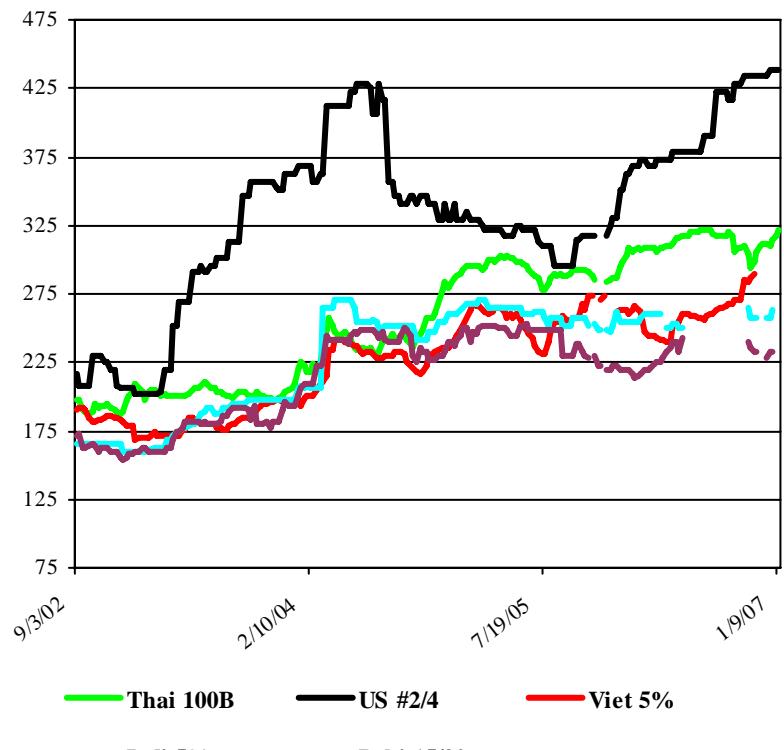

RICE: WORLD MARKETS AND TRADE

PRICES:

International: Export prices in Thailand remain high given the strength of the baht and buying interest from Middle East and Asian countries. There are no quotes out of Vietnam due to the export ban though there are reports that state owned exporting firms will be allowed to respond to tenders from Indonesia and the Philippines.

Domestic: U.S. #2/4 long grain milled rice quotes remain unchanged from last month at \$434 per ton, FOB despite advances in late December. The spread between comparable qualities of Thai and U.S. rice is \$113 per ton compared to \$55 per ton this time last year. U.S. medium grain prices have retreated from last month's highs of \$575 per ton price to \$565 per ton, FOB.

Nominal Rice Quotes – 2002 to Present

TRADE CHANGES FOR 2007

Selected Exporters

- **Pakistan** is up 100,000 tons to 3.0 million in expectation of greater demand.
- **Thailand** is up 450,000 tons to 8.7 million due to increased regional demand and strong prices.
- **Vietnam** is up 200,000 tons to 4.9 million also due to increased regional demand and strong prices.
- **United States** is up 200,000 tons to 3.4 million on the expectation of greater demand from major trading partners.

Selected Importers

- **Indonesia** is tripled to 1.8 million tons as the prolonged dry season has delayed plantings and harvest in major producing areas.
- **Philippines** is up 200,000 tons to 1.8 million in anticipation that the government will build stocks.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

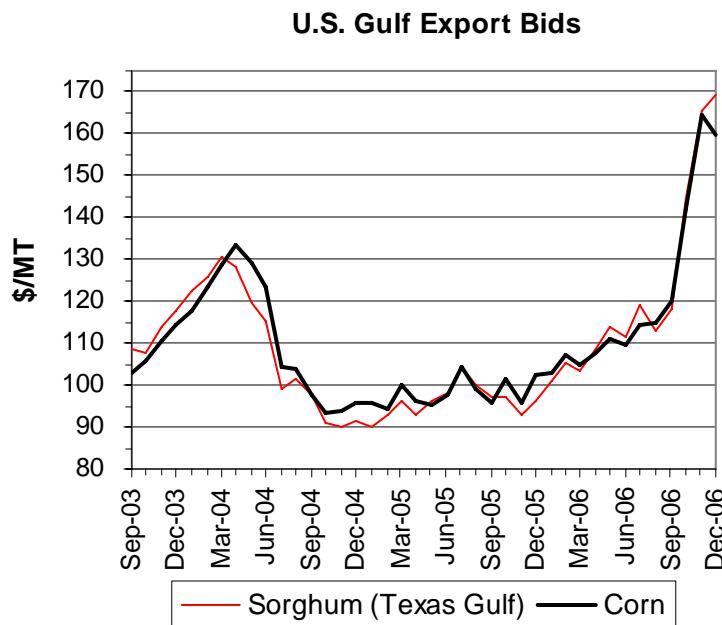

COARSE GRAINS: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Taiwan Seeks Chinese Corn:

Recently, Taiwan's livestock industry has shown interest in purchasing up to 500,000 tons of Chinese corn due to high U.S. prices. However, trade sources expect perhaps 50,000 tons will be purchased and delivered by the end of February, when the current Taiwanese government authority expires. Strong domestic demand is keeping Chinese corn out of the export market, and there is little history to suggest large sales to Taiwan that would significantly impact U.S. dominance in that key corn market. Taiwan is expected to import 4.5 million tons of corn this year, nearly all from the United States.

PRICES:

Domestic: December export bids for U.S. #2 yellow corn dropped for the first time in 6 months and averaged \$160. Prices remain high with strong domestic and foreign demand, and slack competition from China and Argentina.

TRADE CHANGES IN 2006/2007

Selected Exporters

- **United States corn** is up 1.0 million tons to 56.5 million. Huge outstanding sales, a rapid shipment pace to date, and continued limited competition have combined to push exports to a 12-year high despite soaring prices.
- **Brazil corn** is raised 1.0 million this month to 4.5 million because of ample exportable supplies and strong shipments in recent months.
- **Ukraine corn** is cut in half to 1.0 million tons and **Ukraine barley** is lowered 300,000 tons to 4.0 million because of export quotas that are restricting trade.
- **Argentina sorghum** is up 350,000 tons to 600,000 based on early export registrations, increased exportable supplies (largest crop in 7 years), and strong shipments to Japan.

-
- **U.S. sorghum** is down 200,000 tons to 4.2 million based on the slow pace of sales, especially to Mexico. This is the lowest level of exports in over 20 years.

Selected Importers

- **EU-25 corn** is raised 500,000 tons again this month to 4.0 million based on the pace of import licenses. This is more than double from last year and the accession of Bulgaria and Romania will likely increase corn trade to the EU-25.
- **Mexico corn** is up 500,000 tons to 6.8 million because of rapid purchases and shipments.
- **China barley** is lowered 200,000 tons to 2.0 million as a result of tightness in key suppliers such as Australia and Canada as well as a large domestic crop.

Notes: Stocks, exports and consumption are expressed on a milled basis in marketing years. "Stocks as a % of consumption" represents the ratio of marketing year ending stocks to total consumption.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Latin America: Central America, the Caribbean, South America.

EU: Austria, Belgium/Luxembourg, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Bulgaria, Croatia, Gibraltar, Iceland, Macedonia, Norway, Romania, Serbia and Montenegro, Switzerland, Yugoslavia.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Other Africa: all African countries except North Africa.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

EU Consolidation: The trade figures for the EU-25 for the years 1999/00 through 2002/03 are inflated by the two-way trade between the two groups (EU-15 and acceding 10). Over the past 6 years, this “intra-trade” has averaged about 700,000 tons for wheat, 350,000 tons each for corn and barley, and 150,000 tons for rye. The trade figures also include intra-trade between members of the acceding 10. From 2003/04 onward, all intra-trade has been removed.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Field Crops and Livestock Branch, Industry and Sector Analysis Division, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-6590.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 12-06 December 2006. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 01-07 January 2007.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
