

Grain: World Markets and Trade

Mexico Grows as Grain Importer, Supplied Primarily by the United States

Over the past decade, Mexico has expanded its role as a top grain importer, nearly doubling its combined imports of corn, wheat, and rice over this period. Mexico’s imports are now forecast to slightly exceed those of Japan, which for many years had been the top grain importer. Greater corn demand to satisfy Mexico’s growing feed sector drives this growth. Wheat imports have been stimulated by increased use of high-quality bread wheat, in comparison to durum which the country produces (and exports). Rice imports have also grown as production has not kept pace with rising consumption.

Cumulatively, the United States is the top global supplier of these three major grains and has been the dominant supplier for the Mexican market. In addition to the opportunities provided through NAFTA, the freight and logistical advantages have kept this trade relationship strong. Even as competition from South American and Black Sea exporters has reduced U.S. market share in other top grain importers, Mexico has proved a generally stable market.

Despite some recent competition in the Mexican market, the prospects continue to remain strong for the United States to be the primary supplier. From October to June, U.S. exports of corn and distiller’s dried grains with solubles (DDGS) exceeded the previous year. In the case of wheat, the U.S. share of imports rebounded from just over half in 2015/16 to nearly three-quarters in 2016/17. With rice, a strong preference for price-competitive U.S. paddy continues despite the creation of a tariff-rate quota for all types of rice.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports and therefore differs from global totals shown elsewhere. Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug). 'Marketing Year' column is germane for U.S. wheat only.

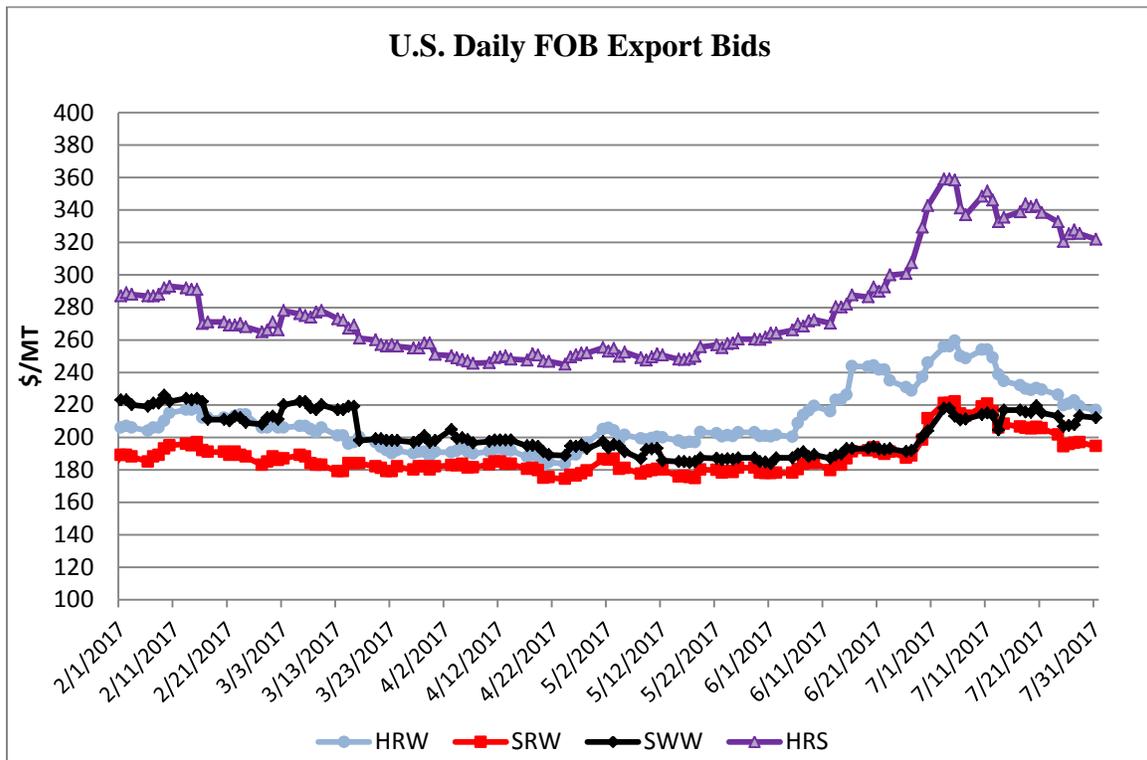

WHEAT: WORLD MARKETS AND TRADE

OVERVIEW

For 2017/18, global production is up this month as larger crops are expected in the Black Sea countries—Russia, Ukraine, and Kazakhstan. Global trade is forecast up slightly this month mainly on larger imports for Indonesia and Nigeria. Exports are raised for the Black Sea countries which more than offset reductions for Canada and the EU. U.S. imports are projected higher based on tightening supplies of high-protein wheat. The season-average farm price is unchanged at \$4.80 per bushel.

For 2016/17, global trade is up, based on higher imports for China, Nigeria, and Vietnam and despite reductions for Bangladesh and South Africa. Exports for the United States and Canada are revised up this month. U.S. imports are raised marginally this month.

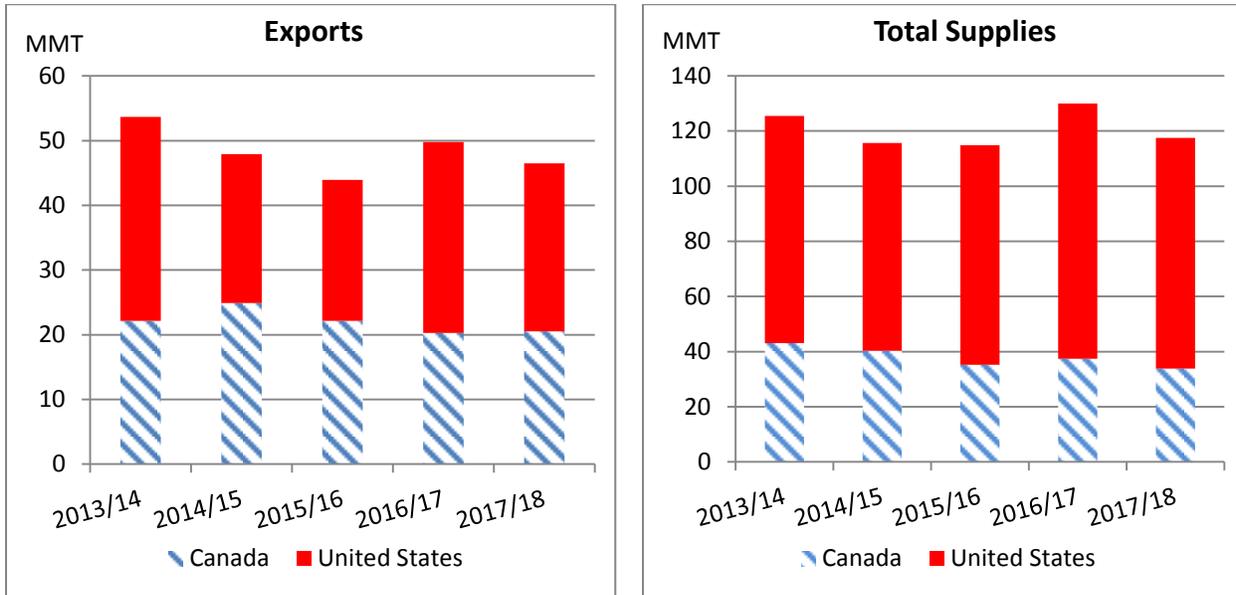

PRICES

Domestic: Wheat prices for July were mainly lower. Hard Red Winter (HRW) plummeted \$29/ton to \$217, while Soft Red Winter (SRW) declined \$17/ton to \$195. Hard Red Spring (HRS) fell \$21/ton to \$322. Wheat prices remain elevated due to dry conditions in the Northern Plains, but have settled lower from the peaks seen in early July on the anticipated harvest. On the other hand, Soft White Winter (SWW) rose \$8/ton to \$212 with strong export sales.

FEATURE

Canadian and U.S. Wheat Exports Down on Tightening Supplies

Year-over-year, combined Canadian and U.S. wheat exports are projected lower based on smaller crops in both countries. However, massive carryin stocks partially offset the lower production. Drought conditions have affected spring wheat production, leading to tight supplies of high-protein wheat. U.S. exports are forecast down year-over-year, while Canada's exports are forecast nearly unchanged amid robust global demand for high-protein wheat. However, a larger amount of Canadian supplies are likely to go to the United States, leaving less for other importers.

The limited availability of Canadian and U.S. wheat is expected to have a major impact on the global market. The EU and Russia are both forecast to have larger crops and are expected to pick up exports at the expense of the United States and Canada. However, the vast majority of the EU and Russian crops will not be of adequate protein to compensate for the reduced availability of U.S. and Canadian spring wheat. Protein premiums have soared in recent months based on tightening supplies of high-protein spring wheat.

TRADE CHANGES IN 2017/18

Selected Importers

- **Bangladesh** is lowered 300,000 tons to 6.5 million based on slower expected consumption growth in light of lower 2016/17 consumption.
- **Brazil** is up 200,000 tons to 7.2 million on a smaller crop.

-
- **Indonesia** is raised 500,000 tons to 10.0 million with larger expected feed demand.
 - **Nigeria** is up 400,000 tons to 5.0 million based on higher expected demand for wheat-based products.
 - **United States** is up 300,000 tons to 4.1 million based on tightening supplies of high-protein spring wheat.

Selected Exporters

- **Canada** is down 1.5 million tons to 20.5 million based on lower exportable supplies.
- **European Union** is down 500,000 tons to 29.5 million based on stronger competition from Russia and Ukraine.
- **Kazakhstan** is up 500,000 tons to 7.5 million on greater exportable supplies and strong international demand for high-protein wheat.
- **Russia** is up 1.0 million tons to a record 31.5 million on record production.
- **Ukraine** is up 2.0 million tons to 16.0 million based on a much larger crop.

TRADE CHANGES IN 2016/17

Selected Importers- based on trade data

- **Algeria** is up 200,000 tons to 8.2 million.
- **Bangladesh** is down 500,000 tons to 5.5 million.
- **China** is raised 400,000 tons to 4.8 million.
- **Nigeria** is up 325,000 tons to 4.9 million.
- **South Africa** is down 280,000 tons to 1.2 million.
- **United States** is up 47,000 tons to 3.3 million.
- **Vietnam** is raised 200,000 tons to 5.2 million.

Selected Exporters- based on trade data

- **Canada** is up 278,000 tons to 20.3 million.
 - **United States** is raised 188,000 tons to 29.5 million.
-

RICE: WORLD MARKETS AND TRADE

OVERVIEW

For 2017/18, global production is revised lower this month on smaller crops in Bangladesh, Sri Lanka, and the United States. Consumption is down fractionally, while stocks continue to grow with additional carryin supplies in Thailand. Global trade is revised higher this month to just below the 2014 record. The U.S. season-average farm price is raised.

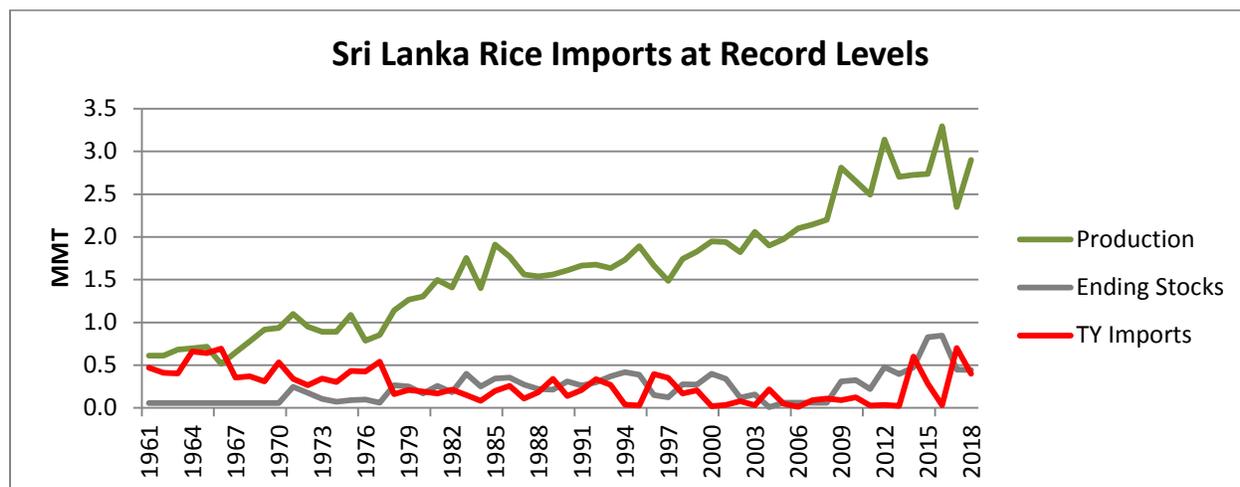

For 2016/17, global production is raised even further to a new record. Trade is revised up on increased demand from Bangladesh, the Philippines, and Sri Lanka.

PRICES

Over the past month, Asian quotes have generally declined, while those in the Western Hemisphere have risen. Thai and Indian quotes have converged around \$410/ton, pressured lower by new crop supplies. Likewise, Pakistani and Vietnamese quotes have both settled just under \$400/ton in the midst of their respective harvests. The Uruguay quotes crept up to \$505/ton, while U.S. quotes rose to \$530/ton, pressured higher in part by fresh demand from the Middle East.

FEATURE

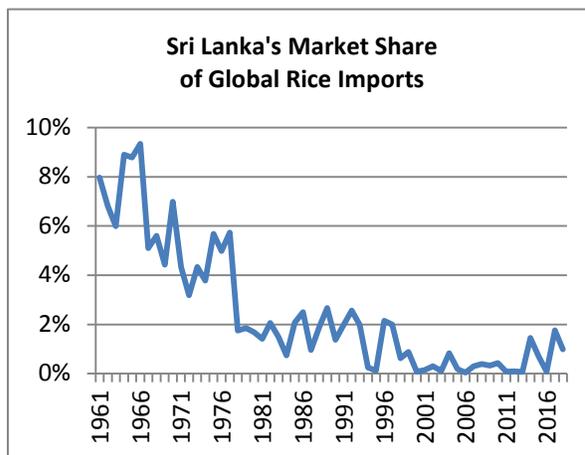

Sri Lanka's reduction in domestic rice supplies is spurring its return to the global market. Sri Lanka's recent rice crops have been affected both by untimely flooding and its worst drought in 37 years. Subsequent seed shortages and diminished reservoir levels are hampering recovery efforts. See [August 2017 World Agricultural Production](#) for further details.

Although Sri Lanka started the year with ample carryin stocks still available from the record 2015/16 crop, the government has depleted most of these stocks by releasing them to stabilize prices. Despite the government's urging traders to sell their rice stocks, the sale of private stocks has been limited as traders continue to wait for higher prices. With these constraints on domestic supplies, prices have continued to rise.

As a result, Sri Lanka is set to import a record 700,000 tons in 2017. Several countries, including Indonesia, India, and Pakistan have supplied limited amounts of food aid. However, the bulk of the imports are being negotiated through agreements with neighboring countries including India, Thailand, Vietnam, and Burma. In addition, the Sri Lankan government has substantially lowered the import tariff to encourage additional imports.

Over the past 60 years, Sri Lanka has become far less dependent on imports due to a steady increase in production. In the 1960s, Sri Lanka accounted for almost 10 percent of global rice imports while it has been virtually absent from the global rice market since 2000. The anticipated imports in 2017 would cause its share in global trade to surge once again.

Selected Trade Changes for 2018

- **Sri Lanka** imports are boosted 350,000 tons to 400,000 due to increased government efforts to offset the severe impact of drought on domestic production.
- **China** exports are raised 100,000 tons to 1.0 million on expectations of continued large shipments to Africa.
- **Egypt** exports are cut in half to 100,000 tons as the government continues to restrict exports.
- **India** exports are lifted 500,000 tons to 11.5 million due to continued regional demand.

Selected Trade Changes for 2017

- **Bangladesh** imports are up 100,000 tons to 800,000 on government purchases to restore supplies after a poor crop.
- **Nigeria** imports are revised up 100,000 tons to 2.2 million on trade to date.
- **Philippines** imports are raised 200,000 tons to 1.6 million based on larger government purchases to replenish tight stocks.
- **Sri Lanka** imports are boosted 300,000 tons to 700,000 due to increased government efforts to offset the severe impact of drought on domestic production.
- **China** exports are raised 100,000 tons to 900,000 on continuously larger shipments to Africa.
- **India** exports are boosted 500,000 tons to 11.0 million due to higher drought-driven demand from Bangladesh and Sri Lanka.
- **Vietnam** exports are revised up 200,000 tons to 6.0 million on stronger sales within the region and a new government-to-government deal with Bangladesh.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on a trade year basis. All other data are reported using local marketing years.

COARSE GRAINS: WORLD MARKETS AND TRADE

OVERVIEW

For 2017/18, global corn production is down slightly as smaller crops in Canada and the EU more than offset higher prospects in Russia. Global trade is raised on higher projected imports for the EU and Iran. Exports are boosted for Brazil and Ukraine. Barley trade is little changed as a smaller barley crop in the EU reduces exportable supplies, while a larger crop in Ukraine boosts barley export prospects. The U.S. season-average farm price is unchanged at \$3.30 per bushel.

For 2016/17, global corn production is up from last month driven by a larger crop in Brazil. Global trade is slightly higher as greater exports for Ukraine more than offset lower shipments from Brazil. The U.S. season-average farm price is unchanged at \$3.35 per bushel.

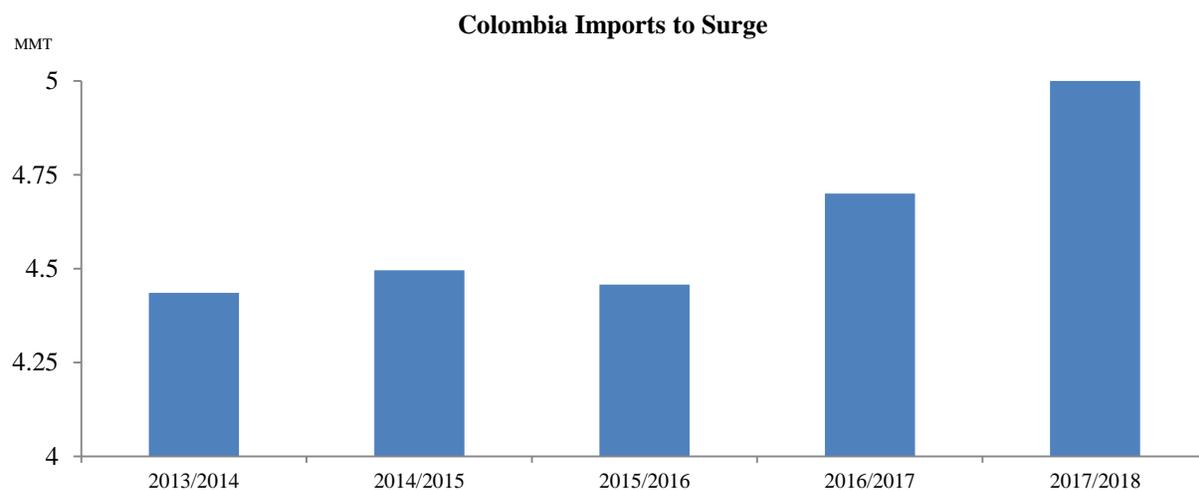

PRICES

Global corn prices have trended down from last month's WASDE on improved prospects for abundant global supplies, as well as weather eroding premiums during July. Although Argentine bids were mostly unchanged from last month at \$153/ton, prices ended lower for other major suppliers. Ongoing harvests pressured Brazilian prices lower by \$3/ton, settling at \$159. Black Sea quotes dropped \$6/ton to \$170. U.S. quotes also fell slightly to \$163/ton, owing to weather prospects.

FEATURE

Colombia: A Promising Market for U.S. Corn

After Mexico, Colombia is the second-largest market for U.S. corn in the Western Hemisphere. Because Colombia does not produce enough yellow corn domestically, it is heavily reliant on imports to meet growing demand from its pork and poultry industries. U.S. corn has dominated this nearly 4.5 million ton import market with almost complete market share in CY 2016. In addition, the 2012 U.S.-Colombia Trade Promotion Agreement (TPA) provides for more competitive U.S. corn prices relative to other suppliers (i.e. Argentina and Brazil), as the TPA eliminated U.S. corn from being subject to variable duties under Colombia's Andean Community Price Band System. These duties are quite punitive when global corn prices are low.

As a result, imports have surpassed the U.S. corn quota every year since 2014, suggesting robust demand and promising growth. As Colombia's U.S. corn quota expands and duties outside the quota continue to decline under the TPA, greater growth is expected in the future.

TRADE CHANGES IN 2017/18

Selected Exporters

- **Brazilian corn** is up 1.5 million tons to 35.0 million on a larger projected 2017 second-crop harvest and expectations that some shipments will shift forward from the previous year. 2016/17 exports are cut 1.0 million tons to 21.0 million.
- **Ukrainian corn** is boosted 1.0 million tons to 21.5 million reflecting expectations of robust EU and Iranian demand. 2016/17 exports are up 1.0 million tons to 21.5 million on recent trade data.

Note: Ukrainian corn stocks have been revised (MY 2008/09-2015/16) to better reflect the State Statistical Committee's published data.

- **Russian corn** is up 500,000 tons to 6.5 million on a larger crop and strong demand from Iran. 2016/17 exports are up 200,000 tons to 5.5 million due to recent trade data from the Federal Customs Service.
- **Serbian corn** is down 300,000 tons to 2.2 million reflecting a smaller crop and expected intense competition from Ukraine.
- **South African corn** is up 200,000 tons to 1.9 million on a larger new-crop 2017 harvest and strong expected demand from African countries.
- **Canadian corn** is down 200,000 tons to 1.3 million on a smaller crop and expected strong competition from other global exporters. 2016/17 exports are up the same amount to 1.3 million on recent trade data.
- **EU corn** exports are slashed 800,000 tons to 1.5 million reflecting a smaller crop and expected competition from Ukraine, Russia, and South America.
- **Ukrainian barley** is boosted 800,000 tons to 4.4 million on larger production and expectations of competitive prices relative to other major suppliers.
- **EU barley** is down 500,000 tons to 6.5 million on lower production and projected substantial competition from Ukraine and Russia.
- **Australian barley** is cut 200,000 tons to 5.8 million on smaller exportable supplies. Tighter supplies were a result of higher 2016/17 exports, which are up 300,000 tons to 9.3 million on strong Chinese demand.
- **Russian barley** is up 200,000 tons to 3.8 million on larger production.
- **U.S. sorghum** is up 250,000 tons to 5.5 million on larger production and expectations of robust Chinese demand.

Selected Importers

- **EU corn** is boosted 1.0 million tons to a world-leading 16.0 million reflecting a smaller crop and expectations of robust demand for corn from Ukraine and South America. 2016/17 imports are also up 300,000 tons to 13.4 million on recent trade data and affordable global supplies.
- **Iranian corn** is boosted 1.0 million tons to 10.0 million on expectations for continued growth in the domestic feed industry and large global supplies. 2016/17 imports are boosted 500,000 tons to 9.0 million on strong shipments from Ukraine and Brazil.

-
- **Zimbabwe corn** is slashed 800,000 tons to 100,000 on expectations for a larger crop in tandem with a current import ban.
 - **Indian barley** tripled to 300,000 tons on expectations of strong demand for imported feed barley from South America.
 - **Chinese sorghum** is up 250,000 tons to 4.5 million on expectations of greater feed use.

TRADE CHANGES IN 2016/17

Selected Exporters

- **Paraguayan corn** is down 200,000 tons to 1.9 million on recent trade data.

Selected Importers

- **Chinese barley** is boosted 300,000 tons to 6.5 million on continued strong purchases of Australian barley.
- **Moroccan corn** is trimmed 300,000 tons to 2.0 million on lower-than-expected imports for the first half of 2017.

Notes: Stocks, exports and consumption are expressed on a milled basis in marketing years.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama.

Caribbean: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Cuba, Dominica, Dominican Republic, French West Indies, Grenada, Guadeloupe, Haiti, Jamaica and Dep, Leeward-Windward Islands, Martinique, Montserrat, Netherlands Antilles, Puerto Rico, Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands, Virgin Islands of the U.S.

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands (Islas Malvinas), French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela.

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, Macedonia, Montenegro, Norway, Serbia, Switzerland.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Sub-Saharan Africa: all African countries except North Africa.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2016/17 starts in 2016); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2016/17 starts in 2017). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	European Union (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
European Union (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent the European Union (Croatia plus the former EU-27) and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria, Romania, and Croatia, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Global Commodity Analysis Division, Office of Global Analysis, Foreign Agricultural Service, USDA, Washington, DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-3448.

Note: The previous report in this series was Grain: World Markets and Trade July 2017. For further details on world grain production, please see World Agricultural Production August 2017.

This circular is available in its entirety on the Internet via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
