

# Oilseeds: World Markets and Trade

## China Drives Global Soybean Import Demand Higher

Global soybean imports for 2011/12 are forecast to rise, driven by China's crushing sector which continues to capture the value added from processing beans into meal and oil. Demand for soy oil, the most common vegetable oil, is expected to remain strong stimulated by rising incomes. Demand for soy meal is likely to grow as the hog sector recovers from earlier reductions caused by diseases and low prices.

Conversely, soybean import demand by other countries is expected to remain flat. Many countries find purchasing meal or oil more flexible and economical than buying beans and processing them.

## OVERVIEW

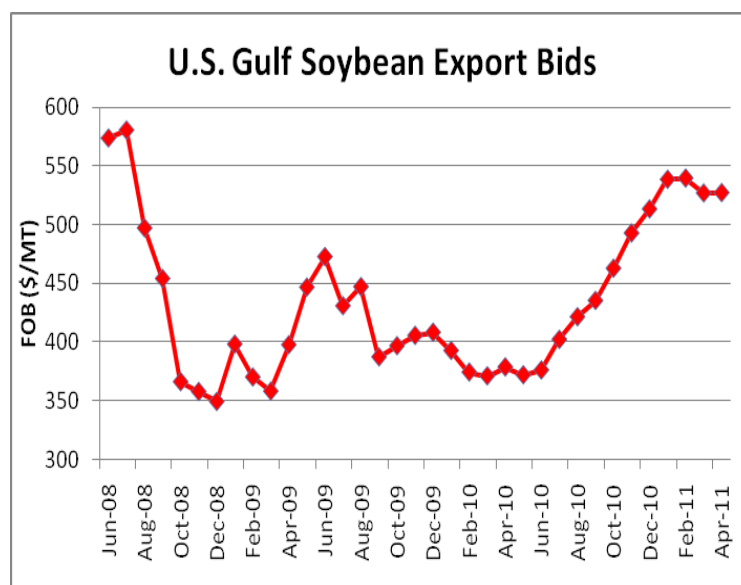

U.S. soybean exports in 2010/11 are reduced due to a slow pace in shipments and a slowdown in demand from China. Export prices, FOB Gulf, remain elevated due to tight stocks.

Prevailing strong prices are expected to stimulate area expansions, leading to a record global soybean production in 2011/12. Global trade is projected at a record spurred by strong demand in China and ample exportable supplies in South America. Global demand for soybean oil and meal will continue to expand.

## SOYBEAN PRICES

U.S. export bids, FOB Gulf, in April averaged \$527 per ton, unchanged from last month, supported by tight stocks. A slow pace in shipments, however, could help build stocks.

As of the week-ending April 28, U.S. soybean commitments (outstanding sales plus accumulated exports) to China totaled 25.6 million tons, compared to 21.9 million a year ago. Total commitments to the world are 41.1 million tons compared to 37.4 million for the same period last year.

## 2011/12 TRADE OUTLOOK

- U.S. soybean exports are forecast at 41.9 million tons, reflecting strong competition from South America. The projected smaller crop could limit exportable supplies.
- Brazil's soybean exports are forecast at a record 33.5 million tons on an expected larger crop.
- Argentina's soybean exports are forecast at 11.8 million tons, sharply up from the current year, based on an expected near record crop.
- China's soybean imports are forecast at a record 58 million tons as strong demand for crush continues.

## TRADE CHANGES IN 2010/11

- U.S. soybean exports are cut 0.8 million tons to 45.2 million due to a slow pace in shipments.
- Combined Argentina's and Brazil's soybean exports are cut 2.0 million tons to 9.5 million and to 32.3 million, respectively, primarily in response to slowing demand from China.
- China's soybean imports are slashed 2.5 million tons to 54.5 million to reflect slowing demand impacted by the release of government stocks and a draw-down of large stocks.
