

Oilseeds: World Markets and Trade

U.S. Market Shares Peaks on Strong EU Imports

European Union soybean imports have been growing steadily over the last few years along with U.S. market share, which is expected to approach 40 percent in 2015/16. Imports from the United States are up as well as the total quantity of soybeans imported from all sources. If realized, this will be the largest import volume from the United States since 2003 and the largest U.S. trade share since the 1990s. This increase reflects both the surge in U.S. exports and the slowing of South American trade observed in recent months.

EU soybean imports are forecast to decline to 13.0 million tons in 2016/17. This lower volume, along with an expected increase in South American supplies, will likely lead to reduced import volume and trade share for the United States, with the U.S. share returning to levels typically observed over the past few years. The decline in EU soybean imports is expected to be offset by increased imports of soybean meal, reflecting both increased availability from South America and growing need to augment domestic protein meal supplies. Prospects of reduced rapeseed production and limited expansion of sunflowerseed crush are expected to contribute to increased soybean meal demand in the EU. The move to increase meal imports at the expense of soybean crush is further encouraged by the limited domestic demand for the oil, where excess soybean oil is generally exported to North Africa. With prospects for increased crush in South America, the EU will face increasing competition for soybean oil in North Africa which will further reduce the incentive to import additional soybeans for crush.

OVERVIEW

2016/17

Global oilseed production is forecast up this month, primarily on higher soybean and rapeseed output. Soybean production is projected up for the United States, Brazil, and Canada. Rapeseed crop is raised for Australia and Canada. Soybean imports are forecast higher on greater demand by Iran, Mexico, and Thailand. Exports are up on larger shipments from the United States, Canada, and Paraguay, more than offsetting the reduction in Argentina exports. Global stocks are up significantly led by Argentina, Brazil, China, and the United States. The U.S. season-average farm price is unchanged at \$9.05 per bushel.

2015/16

Global soybean production is slightly up on higher Indian production, offsetting a reduction in the United States. Imports are up on a stronger demand from the European Union, Mexico, and Thailand. Exports are down slightly with smaller shipments from the United States and Brazil more than offsetting gains from Paraguay and Uruguay. Global stocks are raised this month, mainly on reduced South American crush and exports.

SOYBEAN PRICES

U.S. export bids in September, FOB Gulf, averaged \$397/ton, down \$16 from last month.

For the week ending September 29, U.S. 2016/17 soybean export commitments (outstanding sales plus accumulated exports) to China totaled 12.6 million tons compared to 9.2 million a year ago. Total commitments to the world are 28.3 million tons, compared to 21.9 million for the same period last year.
