Approved by the World Agricultural Outlook Board

November 12, 2004

WHEAT: Projected U.S. 2004/05 ending stocks of wheat are 568 million bushels, 1 million bushels less than last month. Production is down 6 million bushels (mostly in Hard Red Spring wheat) but that is nearly offset by a 5-million-bushel increase in Soft Red Winter (SRW) wheat imports. Seed use rises 1 million bushels. Food use, feed and residual, and exports of wheat are unchanged, but changes are made in the by-class allocation of domestic use and exports. The projected price range is raised 10 cents on the lower end of the range to \$3.20 to \$3.50 per bushel because of stronger-than-expected prices during the past month.

Projected 2004/05 global wheat production, use, and stocks are up slightly from last month. Global wheat production is raised 1.1 million tons to a record 617 million tons because of larger foreign production. Larger crops are projected for the EU-25 (up 1.2 million tons) and Russia (up 1 million tons), with smaller increases for Argentina and Brazil. Australia's crop is down 1 million tons; Canada's is down 0.5 million tons; and smaller reductions are projected for Algeria and South Africa. Global consumption is raised fractionally from last month. Global imports and exports are up slightly from last month due to changes in a number of countries. The largest change in imports is a 0.3-million-ton increase for Algeria. Relative to last month's projections, Russia's exports are up 1 million tons, Argentina's are up 0.5 million tons, while the exports of Kazakhstan are down 0.5 million tons. Small changes in exports and imports are projected for several other countries. Global ending stocks are 0.7 million tons larger than last month's projection with the largest changes occurring in the EU-25 (up 1.2 million tons), Argentina (down 0.7 million tons), Canada (down 0.5 million tons), and Kazakhstan (up 0.5 million tons).

COARSE GRAINS: Further increases are projected this month for 2004/05 U.S. feed grain production and ending stocks. Forecast corn production, a record 11.741 billion bushels, is up 128 million bushels from last month. Also, grain sorghum production is up 10 million bushels. Due to revisions in harvested area, barley and oat production are both down 1 million bushels. Projected feed and residual use of corn, sorghum, and barley are up from last month. Corn and grain sorghum exports are each reduced 25 million bushels due to the slow pace of export sales to date and lower projected imports by Mexico, South Korea, and several other major markets. No change is made to industrial use of corn. Relative to last month, projected ending stocks of corn are up 128 million bushels and sorghum stocks are up 20 million

bushels. The projected price range is down 5 cents on each end from last month for corn to \$1.70 to \$2.10 per bushel. The price range of sorghum is down 15 cents on each end to \$1.55 to \$1.95 per bushel.

Global 2004/05 coarse grain supply, use, and stocks projections are up from last month. Global production is raised to a record 985 million tons, up 8 million tons from last month and 9 percent larger than 2003/04. Relative to last month, larger crops are projected for China (up 4 million tons), the United States (up 3.5 million tons), and the EU-25 (up nearly 1 million tons). Crop reductions are noted for Brazil (down 0.5 million tons), Australia (down 0.4 million tons), and Bolivia (down 0.3 million tons). Production changes are projected for a number of other countries. Global consumption is raised slightly but global trade is down slightly from last month. Reduced imports are projected for Mexico, South Korea, Egypt, Turkey, the Philippines, Japan, and Brazil. Larger imports by Peru, Iran, Indonesia, and other countries are partially offsetting. Smaller exports are projected for the United States, Australia, and Indonesia but larger exports are projected for the EU-25. Global coarse grain stocks rise 8 million tons from last month and are up 21 million tons from last year. China's stocks increase 4.1 million tons due primarily to the larger corn crop. Ending stocks also rise for the United States, with smaller increases projected for South Africa, South Korea, Russia, Ukraine, and other countries. Notable declines in stocks are projected for Mexico, Brazil, and Australia, with smaller reductions forecast for other countries.

RICE: U.S. rice production in 2004/05 is forecast at a record 227.65 million cwt, 1 percent above last month and 14 percent above 2003/04. Average yield is forecast at a record 6,828 pounds per acre, up 65 pounds per acre from last month. Area planted and harvested are unchanged from a month ago. Long-grain production is forecast at 165.9 million cwt, 1 percent above last month, while combined medium- and short-grain production is forecast at 60.8 million cwt, up 1 percent from last month. Domestic and residual use is unchanged from a month ago. Exports in 2004/05 are projected at 105 million cwt, 1 percent above last month. Rough rice exports are projected at 32 million cwt, unchanged from last month, while combined milled and brown rice exports are projected at 73 million cwt (rough-equivalent basis), 1 percent above last month. Long-grain exports are projected at 80 million cwt, up 1 percent from last month, while combined medium- and short-grain exports are unchanged. Ending stocks are projected at 41.8 million cwt, 3 percent above last month, 77 percent above 2003/04, and the largest stocks since 1986/87. The season- average farm price is unchanged at \$7.00 to \$7.50 per cwt.

Global 2004/05 rice production and ending stocks are raised from a month ago, while imports, exports, and consumption are lowered. Global production is projected at 398 million tons, slightly above last month and 2 percent above 2003/04. The increase in global production is due primarily to larger crops projected for Indonesia, Peru, South Korea, Japan, and the United States, which are partially offset by a reduction for Thailand. Import projections are lowered for Indonesia, Mexico, and Bangladesh and raised for South Africa, Malaysia, and Saudi Arabia. Rice export projections are lowered for Thailand and China. The decrease in global consumption is due mostly to a decline in Indonesia. World rice ending stocks for 2004/05 are projected at 71.4 million tons, up 3.1 million tons from last month, but down 14.1 million tons from 2003/04 and the lowest stocks since 1983/84. The increase in stocks this

month is due primarily to increases in Indonesia, China, Vietnam, and Thailand.

OILSEEDS: U.S. oilseed ending stocks for 2004/05 are projected at 13.8 million tons, up 1.6 million tons from last month due to increased soybean and cottonseed production. U.S. total oilseed production is projected at 96.8 million tons, up 1.6 million tons from last month. Soybean production is forecast at a record 3,150 million bushels, up 43 million bushels from last month based on a record soybean yield of 42.6 bushels per acre. Cottonseed production is forecast up 366,000 short tons from last month.

Projected soybean exports are reduced 15 million bushels, mainly reflecting lower import demand in China. Higher freight rates are expected to moderate stock accumulation by crushers in China. Soybean ending stocks are projected at 460 million bushels, which would be the highest level since 1985/86. Soybean oil use is increased this month reflecting the impact of new tax incentives for biodiesel production.

The U.S. season-average soybean price for 2004/05 is projected at \$4.55 to \$5.35 per bushel, down 15 cents on both ends of the range. The soybean meal price is projected at \$145 to \$175 per short ton, down 5 dollars on both ends of the range. The soybean oil price is projected at 21.5 to 24.5 cents per pound, unchanged from last month.

Global oilseed production for 2004/05 is projected at a record 388.5 million tons, up 2.7 million tons from last month. Foreign oilseed production is increased 1.1 million tons, primarily due to higher rapeseed, sunflowerseed, and cottonseed production. EU-25 rapeseed production is raised 0.2 million tons to 14.5 million tons, 3.5 million tons higher than last year's drought-reduced crop. Other changes include increased rapeseed production for India and increased sunflowerseed production for Russia. Foreign vegetable oil production is raised 1 million tons to 96.6 million tons, primarily due to higher palm oil production in Malaysia and Indonesia.

SUGAR: Projected U.S. sugar supply for 2004/05 is decreased 259,000 short tons, raw value, from last month, mainly due to lower beginning stocks. Total sugar production is decreased 61,000 tons, based on processors' production projections submitted to the Farm Service Agency. Lower cane sugar production in Florida and Louisiana more than offsets higher U.S. beet sugar production.

For 2003/04, ending stocks of 1.907 million tons are down from 2.105 million tons last month, based on processor reporting of fiscal-year supply, export sales, and domestic deliveries. Total supply is reduced 138,000 tons, due mainly to lower production. Total use is increased 60,000 tons, as higher sales for export and residual statistical discrepancies more than offset lower total deliveries.

LIVESTOCK, POULTRY, AND DAIRY: Total U.S. meat production forecasts for 2004 and 2005 are raised. Meat production forecasts for 2004 are slightly higher based on actual slaughter in the third quarter and larger expected output in the fourth. Projected meat production in 2005 is raised 130 million pounds as higher beef production more than offsets lower pork production. Projected beef production is raised as feedlot marketings are expected to be higher and cattle weights heavier. Pork production for 2005 is lowered as the recent

announcement of anti-dumping duties on Canadian hogs is expected to lead to some shifting from imports of slaughter hogs to imports of pork. Poultry production is changed fractionally.

Beef trade in 2005 is raised to reflect expectations of continued recovery in sales to Mexico. These forecasts do not assume a resumption of beef trade with Japan at this time. The United States and Japan have agreed to resume trade in beef once respective conditions have been met. The conditions are being determined and are subject to approval by each government. As the conditions are worked out, forecasts will be adjusted to reflect new information. Broiler exports for 2004 and 2005 are raised sharply. Forecasts in 2004 are raised based on stronger-than-expected sales to Mexico, Canada, and the Commonwealth of Independent States. The recent announcement by China allowing the import of poultry products, coupled with stronger sales to other markets, is expected to result in higher 2005 broiler exports compared to last month. Turkey export forecasts are raised from last month to reflect stronger exports to a number of markets and the expected resumption of trade with China. The pork export forecast is unchanged from last month but pork imports for 2005 are raised as the recently announced anti-dumping duties on Canadian hogs are expected to result in some shift in trade from slaughter hogs to pork.

Cattle price forecasts are reduced slightly in both 2004 and 2005 because of increased beef output. Hog price forecasts for 2004 are raised because of higher-than-expected recent prices. Hog prices are unchanged in 2005. Broiler prices in the fourth quarter of 2004 are reduced.

The milk production forecast for 2004/05 is increased because the cow herd is expected to decline more slowly than forecast last month. Milk per cow is unchanged. Commercial use, both fat and skim basis, is expected to be stronger. Milk price forecasts for 2004/05 are raised from last month because of stronger demand for milkfat, especially in the first quarter of the marketing year. Class III and Class IV milk prices are higher than last month as recent cheese and butter prices have strengthened. The all milk price is raised to \$13.75 to \$14.45 per cwt for 2004/05.

COTTON: A sharply higher production estimate is raising 2004/05 U.S. ending stocks this month. Production is raised 1.0 million bales, due to higher forecast yields in most States, with Texas accounting for 400,000 bales of the increase. Exports are raised 200,000 bales this month, while domestic mill use is unchanged. Ending stocks are now forecast at 7.5 million bales, marginally above the 2001/02 level.

This month's world estimates for 2004/05 include significant revisions in both supply and demand. World beginning stocks are raised 2.0 million bales, including a 1.6-million-bale increase in China's stocks. China's ending stocks are revised beginning in 1991/92, due to recent evidence which suggests that historical stocks were larger than previously estimated (see FAS early release data after 9 a.m. at www.fas.usda.gov/cotton/circular/early/table1.pdf for details). Beginning stocks also are raised for Australia, due to revisions in production estimates beginning in 2001/02. World 2004/05 production is raised in sixteen countries, most notably the United States, Pakistan, Argentina, Uzbekistan, and the African Franc Zone region; production is reduced only in Brazil, Turkey, and Paraguay. World consumption is raised

about 1.5 million bales, due mainly to increases for China, India, and Turkey. World trade is slightly higher, as increased imports by China and Turkey are partially offset by reductions for other countries. World ending stocks are raised 2.6 million bales from last month, including 1.3 million bales in China.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 35.

APPROVED:

ANN M. VENEMAN
SECRETARY OF AGRICULTURE

The next issue of this report will be released 8:30 a.m. ET on December 10, 2004.

The *World Agricultural Supply and Demand Estimates (WASDE)* report will be released 8:30 a.m. Eastern Time on December 10, 2004.

In 2005, the *WASDE* report will be released on Jan. 12, Feb. 9, Mar. 10, Apr. 8, May 12, June 10, July 12, Aug. 12, Sept. 12, Oct. 12, Nov. 10, and Dec. 9.

Make Plans for Agricultural Outlook Forum 2005

Sharpen your strategy for 2005 by attending the USDA Outlook Forum, February 24-25, 2005 in Arlington, Virginia. E-mail agforum@oce.usda.gov to be notified or register at www.usda.gov/oce/forum. For more information call 202-720-5447.

The 2005 Forum will highlight the impact of scientific knowledge and findings on agricultural policy and markets. Top USDA officials will open the meeting on February 24 with an overview of agricultural prospects. Leading analysts will be on hand to debate planting, trade, and price prospects for farm commodities in the year ahead. Attendees will receive a set of new USDA long-term commodity projections to 2014. There will be ample time for networking at this popular event, which attracted 1,400 people last February.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" except imports (U.S. Customs Service, Census Bureau). 2/ Production for 2004/05 is based on processors' projections compiled by the Farm Service Agency. Other projections are based on analyses the Interagency Commodity Estimates Committee for sugar. 3/ Production by state for 2003/04 (projected 2004/05): FL 2,154 (1,888); HI 251 (286); LA 1,373 (1,467); TX 175 (170). 4/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2004/05, includes shortfall of 50,000 tons. 5/ Includes sugar under the re-export and polyhydric alcohol programs. 6/ Includes high-tier and other. 7/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed. 8/ Residual statistical discrepancies.

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton.

5/ Weighted average for August-September 2004. USDA is prohibited by law from publishing cotton price projections.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2004/05 is 40.7 percent.

1/ Marketing year beginning August 1. Totals may not add exactly and trade may not balance due to rounding and other factors. 2/ Generally reflects cotton lost or destroyed in the marketing channel; for Australia, Brazil, and the United States, reflects the difference between implicit stocks based on supply less total use and indicated ending stocks. 3/ Less than 5,000 bales.

4/ Includes Egypt and Syria in addition to the countries and regions listed.

5/ Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. 6/ Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Cote d'Ivoire, Mali, Niger, Senegal, and Togo. 7/ Argentina, Australia, Paraguay, South Africa, and Zimbabwe. 8/ Includes intra-EU trade. 9/ Hong Kong, Indonesia, Japan, South Korea, Taiwan, Thailand, and Vietnam.

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and EU. 4/ India, China and Pakistan.

1/ Marketing year beginning October 1. 2/ Milk equivalent, milkfat basis.

3/ Includes commercial exports. 4/ Includes products exported under the Dairy Export Incentive Program. 5/ Milk of average test. Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 32-34 present a 23-year record of the differences between the November projection and the final estimate. Using world wheat production as an example, changes between the November projection and the final estimate have averaged 4.9 million tons (0.9%) ranging from -18.1 to 7.2 million tons. The November projection has been below the estimate 15 times and above 8 times.

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Wheat: William Tierney, Chairperson, WAOB

Frank Gomme, FAS; Tom Tice, FSA; Gary Vocke, ERS.

Rice: Andrew C. Aaronson, Chairperson, WAOB

Michelle Moore, FAS; Tom Tice, FSA; Nathan Childs, ERS.

Feed Grains: William Tierney, Chairperson, WAOB

Alan Riffkin, FAS; Philip W. Sronce, FSA; Allen Baker, ERS.

Oilseeds: Keith Menzie, Chairperson, WAOB

Pete Burr, FAS; Mark Ash, ERS; Philip W. Sronce, FSA.

Cotton: Carol Skelly, Chairperson, WAOB

John Wade, FAS; Scott Sanford, FSA; Mark Peters, AMS; Leslie Meyer, ERS.

Sugar: John Love, Chairperson, WAOB

Ron Lord, FAS; Daniel Colacicco, FSA; Stephen Haley, ERS.

Meat Animals: Shayle Shagam, Chairperson, WAOB

Wendell Dennis, FAS; Milton Madison, FSA; Warren Preston, AMS; Ron Gustafson, ERS.

Poultry: Shayle Shagam, Chairperson, WAOB

Catherine Smith, AMS; Todd Drennan, FAS; Milton Madison, FSA; David Harvey, ERS.

Dairy: Shayle Shagam, Chairperson, WAOB

Paul Kiendl, FAS; John R. Mengel, AMS; James Miller, ERS; Milton Madison, FSA.

Foreign Production Assessments. Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division of FAS, Allen Vandergriff, Director.

Related USDA Reports. The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See <http://www.usda.gov/oce/waob/related.htm> for an explanation of related reports.

Supply and Demand Database. The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.
