WHEAT: Projected U.S. 2005/06 ending stocks of wheat are down 94 million bushels from last month in part reflecting a 69-million-bushel drop in production (reported in the *Small Grains Summary*). HRS ending stocks are down 59 million bushels and, at 119 million bushels, are the smallest since 1995/96. No changes are made to domestic use or imports. Exports rise 25 million bushels due to larger-than-expected sales to Nigeria and Iraq. Exports of HRW and HRS are higher but are partially offset by lower exports of White wheat. The projected 2005/06 price range is \$3.20 to \$3.60 per bushel, up 20 cents on each end from last month, compared with \$3.40 for 2004/05.

Global wheat production in 2005/06 is down over 2 million tons from last month, consumption and imports are up slightly, but ending stocks are down over 2 million tons. Foreign production is down fractionally due primarily to smaller crops in EU-25, Argentina, and Kazakhstan, partially offset by larger crops in Canada, Morocco, Australia, and Romania. Projected global imports are up fractionally due to larger imports by EU-25, Iraq, and Nigeria. Imports by China and Russia are down. Forecast exports rise for Australia, Romania, and Serbia but decline for Argentina, EU-25, and Kazakhstan.

Global consumption is up fractionally. The largest month-to-month consumption increases occur in Nigeria, Canada, Iraq, and Mexico. Global 2005/06 wheat ending stocks fall 2.2 million tons due mostly to lower U.S. stocks. Foreign stocks are up slightly with increases projected in Canada, Morocco, China, and Algeria. Stocks are down in EU-25 and Russia.

COARSE GRAINS: This month's outlook for 2005/06 U.S. corn is for increased production, higher domestic consumption, larger stocks, and lower prices. Forecast 2005 corn production is up 218 million bushels from last month to 10.857 billion bushels (the second largest crop on record). Beginning stocks of 2005/06 corn drop 13 million bushels, based on the September *Grain Stocks* report. Projected 2005/06 feed and residual rises 50 million bushels and food, seed, and industrial use is up 15 million bushels. Exports are unchanged. Corn ending stocks are up 141 million bushels from last month and are 108 million higher than the previous year. The projected 2005/06 price range for corn is \$1.65 to \$2.05 per bushel, down 5 cents on each end from last month, compared with \$2.06 for 2004/05.

Forecast grain sorghum production is down 23 million bushels. Barley production is down 25 million bushels and oat production is down 13 million bushels based on the *Small Grains Summary*. A 2-million-bushel increase in grain sorghum food, seed, and industrial use is more than offset by a 15-million-bushel reduction in feed and residual use. Grain sorghum ending stocks are up 1 million bushels from last month due in part to an 11-million-bushel increase in beginning stocks. Grain sorghum prices in 2005/06 are projected to average \$1.50 to \$1.90, unchanged from last month, compared with \$1.79 for 2004/05.

The global outlook for coarse grains in 2005/06 is for larger production, higher consumption, larger imports, but fractionally lower stocks relative to last month. Foreign production is down just over 1 million tons with the largest declines projected in India, EU-25, China, South Africa, and Argentina. These losses are partially offset by gains in crops in Nigeria, Russia, and Ukraine. Global 2005/06 coarse grain consumption is up nearly 3 million tons with foreign consumption up nearly 2 million tons. There are many month-to-month changes in foreign consumption but the largest changes are a nearly 3-million-ton increase in Nigeria and a 1.5-million decline in India. Imports are up for Brazil, Morocco, and several other countries. Exports are up for Ukraine, Nigeria, and Turkey but are down for Argentina, Brazil, and South Africa. Global 2005/06 ending stocks drop less than 1 million tons from last month but foreign stocks are down over 4 million tons. The largest drop in foreign stocks occur in EU-25, China, South Africa, and India. Stock increases are projected for Mexico, Morocco, the Philippines, and several other countries.

RICE: U.S. rice production in 2005/06 is forecast at 223.2 million cwt, 5.1 million cwt below last month but still the second largest on record. Harvested area remains projected at 3.34 million acres, up less than 1 percent from a year earlier. The average yield is estimated at 6,678 pounds per acre, down 153 pounds per acre from last month and 264 pounds below the 2004/05 record yield. Long-grain production is projected at 175.1 million cwt, down 6.3 million cwt from last month but still the largest on record. Combined medium- and short-grain production is estimated at 48.1 million cwt, up 1.2 million cwt from last month but 13.8 million cwt below 2004/05. Beginning stocks remain estimated at 37.7 million cwt, 14 million cwt above a year earlier. Imports remain forecast at a near-record 15 million cwt, up 1.8 million cwt from 2004/05. Domestic and residual use remains forecast at 126.1 million cwt, the highest on record. Total exports were lowered 2 million cwt to 119 million cwt. Rough rice exports were lowered 1 million cwt to 37 million cwt and milled rice exports were lowered 1 million cwt to 82 million cwt. Ending stocks of all rice are projected at 30.8 million cwt, 3.1 million cwt below last month and 6.9 million below a year earlier. The season-average farm price is projected at \$7.45 to \$7.75 per cwt, up 20 cents on both the high and low end from last month.

Global 2005/06 rice production is lowered 0.9 million tons, with China, Brazil, United States, and Vietnam accounting for most of the decline. In contrast, 2005/06 production forecasts for India, Cuba, Madagascar, and Egypt are raised. Ending stocks are lowered 1.3 million tons to 64.3 million tons, 8.9 million tons below 2004/05 and the smallest since 1982/83. China accounts for most of this month's reduction in 2005/06 global ending stocks. Global consumption was raised fractionally.

OILSEEDS: U.S. oilseed ending stocks for 2005/06 are projected at 8.7 million tons, up 1.6 million tons from last month and up 0.4 million tons from revised 2004/05 ending stocks. Total U.S. oilseed production is projected at 92.8 million tons, up 3.4 million tons from last month. Soybean production is forecast at 2,967 million bushels, up 111 million bushels as higher yields more than offset this month's acreage reductions. Planted and harvested area are both lowered 0.9 million acres based on administrative data. Soybean crush is raised 10 million bushels this month due to increased supplies and lower soybean prices. Soybean ending stocks are projected at 260 million bushels, up 55 million from last month. Other oilseed production is forecast higher this month with increases for sunflowerseed, canola, and cottonseed more than offsetting reduced peanut production.

U.S. season-average soybean prices for 2005/06 are projected at \$5.00 to \$5.80, compared with \$5.15 to \$6.05 last month. Soybean meal prices are also projected lower at \$155 to \$185 per short ton, down \$10 on both ends of the range. Soybean oil prices are projected at 22 to 25 cents per pound, up 0.5 cent on both ends of the range. Higher soybean oil prices reflect market expectations for increased biodiesel production.

Global oilseed production for 2005/06 is projected at 384.9 million tons, up 5.5 million tons from last month and up 5.7 million tons from 2004/05. Foreign oilseed production is raised 2.2 million tons as higher soybean, rapeseed, and sunflowerseed more than offset reduced cottonseed and peanut production. Argentina soybean production is projected at 40.5 million tons, up 1.5 million tons from the previous estimate based on increased area. Higher first crop soybean seedings are expected as Argentine producers switch from wheat and corn. Soybean production for India is projected lower due to reduced yield prospects related to dry weather. Sunflowerseed production is increased for Argentina, Bolivia, EU-25, Russia, Ukraine, and South Africa. Rapeseed production is projected higher for EU-25 and for Canada, where the crop is expected to be the largest since 1999/2000. Other changes include lower cottonseed production for China and Pakistan, partly offset by an increase for India. Lower peanut production projected for China is partly offset by an increase for India.

Global oilseed stocks for 2005/06 are raised this month as production increases more than offset lower beginning stocks and increased use.

SUGAR: Projected U.S. sugar supply for 2005/06 is increased 125,000 short tons, raw value, from last month, mainly due to higher imports. Cane sugar production is dropped 90,000 tons, as lower Louisiana output more than offsets an increase for Florida. Production projections are based on processors' reports compiled by the Farm Service Agency, with the exception of Louisiana, which is reduced to reflect forecast sugarcane production in the October *Crop Production* report. Imports are increased 228,000 tons due to imports from Mexico under the North American Free Trade Agreement while high-tier sugar imports are reduced. Use is increased 50,000 tons in line with the increase in estimated use for 2004/05. Ending stocks are increased to 1.1 million, or 10.5 percent of use.

For 2004/05, supply is increased 52,000 tons, as lower production is more than offset by higher imports under the re-export programs. Total use is increased 65,000 tons, mainly due to continued robust domestic demand for sugar.

LIVESTOCK, POULTRY, AND DAIRY: *Note: Due to uncertainties as to the length of the bans on trade in ruminants and ruminant products because of the discovery of BSE in the United States and Canada, forecasts for 2005 and 2006 assume a continuation of policies currently in place among U.S. trading partners. Subsequent forecasts will reflect any announced changes.*

U.S. beef and pork production forecasts for second-half 2005 are reduced from last month, reflecting lower-than-expected third-quarter slaughter and expectations of lower cattle and hog slaughter in the fourth quarter. Cattle marketings from feedlots have been slower-than-expected and fourth-quarter slaughter forecasts are reduced because cattle are likely to remain on feed longer to achieve Choice or better grades. Third-quarter hog slaughter was lower than expected and the forecast for the fourth quarter is reduced slightly. Broiler production forecasts are reduced from last month as broiler hatchery and laying flock data indicated a slower-than-expected rate of production growth. The turkey production forecast is increased slightly and the egg production forecast is unchanged.

U.S. beef and pork production forecasts for 2006 are unchanged from last month. The September 30 *Quarterly Hogs and Pigs* report indicated that the sector continues to expand relatively slowly. Although growth in pigs per litter is expected to result in increased pig crops into 2006, forecasts of live hog imports from Canada are reduced slightly. Thus, hog slaughter and pork production forecasts are unchanged from last month. The slower pace of growth in broiler production forecast for late 2005 is carried forward into 2006.

Small changes are made to pork export forecasts as prospects remain favorable for growth. Other red meat trade forecasts are unchanged.

Prices for livestock in third-quarter 2005 remained relatively strong and cattle and hog price forecasts for the fourth quarter are raised. Although 2006 cattle prices are expected to decline from their 2005 levels, forecast prices for the first half of 2006 are raised. Broiler prices in 2005 are reduced slightly. Turkey price forecasts in 2006 are raised.

Milk production in 2005 and 2006 is forecast higher than last month. Output per cow is raised for 2005 and 2006, and the milk cow herd is forecast to grow slightly more rapidly in 2006. As a result, the milk production forecast is increased 400 million pounds for 2005 and 1 billion pounds in 2006. Fat-basis commercial demand remains relatively strong and is expected to absorb increased supplies of milk, providing support for increased forecasts of both butter and cheese prices in 2005 and forecast cheese prices in 2006. Commercial use of skim solids is also increased, reflecting firm domestic demand and continued strength in exports. The nonfat dry milk (NDM) price forecast is raised for both 2005 and 2006. The whey price forecast is also raised on strength in exports and strong NDM prices. Higher product price forecasts raise Class price forecasts for both 2005 and 2006. The all milk price for 2005 is forecast higher at \$15.20 to \$15.30 per cwt, and the 2006 forecast is raised to \$13.35 to \$14.25 per cwt.

COTTON: The 2005/06 U.S. forecasts include higher production and offtake, with lower beginning and ending stocks relative to last month. Production is raised 2 percent to 22.7 million bales, due mainly to higher production in Texas. Beginning stocks are reduced 100,000 bales based on estimates for 2004/05 from the Bureau of the Census. The Census Bureau

has also raised its estimate of 2004/05 domestic mill use; the 2005/06 mill use forecast is increased proportional to this revision, while still reflecting a year-to-year reduction. Exports are raised 700,000 bales from last month, supported by larger supplies and higher projected import demand by China. Ending stocks are lowered nearly 9 percent.

Slight revisions in the 2005/06 world supply and demand forecasts result in marginally lower world stocks. World production is virtually unchanged, as decreases for China, Pakistan, and Brazil are about offset by increases for India, the United States, and Uzbekistan. World consumption is raised nearly 1 percent, reflecting increases in China, the United States, and India. Higher world trade is supported by increased import demand by China and Pakistan. World ending stocks are now forecast at 51.0 million bales.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 32.

APPROVED:

CHARLES F. CONNER
ACTING SECRETARY OF AGRICULTURE

The next issue of this report will be released at 8:30 a.m. ET on November 10, 2005. In 2005, the WASDE report will be released on December 9.

2006 Agricultural Outlook Forum: Prospering in Rural America

USDA invites you to attend the 2006 Agricultural Outlook Forum, February 16-17, 2006, in Arlington, Virginia. Among the Forum's speakers are Secretary Mike Johanns and other top officials, industry analysts, business leaders, farmers and ranchers, and experts in agriculture. The Forum offers more than 130 speakers along with numerous networking opportunities — 1,500 people are expected to attend.

For more information, visit: <http://www.usda.gov/oce/forum>

Avg. farm price 4/	61.8	41.6		42.1 5/

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton.

5/ Average price for August 2005. USDA is prohibited by law from publishing cotton price projections.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2005/06 is 29.6 percent.

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and Paraguay. 4/ Japan, China, and EU, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, and India. 4/ Eastern Europe, China, EU, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

			14.10	14.15	12.75	12.95
Class IV	: 10.00	13.20	12.75-	12.85-	11.30-	11.40-
			13.05	13.05	12.40	12.40
All milk 3/	: 12.52	16.05	15.05-	15.20-	13.10-	13.35-
			15.25	15.30	14.10	14.25

1/ Simple average of monthly prices calculated by AMS from NASS weekly average dairy product prices for class price computations. Details may be found at http://www.ams.usda.gov/dyfmos/mib/fedordprc_dscrp.htm. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Wheat: William Tierney, Chairperson, WAOB; Levin Flake, FAS; Tom Tice, FSA; Gary Vocke, ERS.

Rice: Andrew C. Aaronson, Chairperson, WAOB; Stephanie Murphy, FAS; Tom Tice, FSA; Nathan Childs, ERS.

Feed Grains: William Tierney, Chairperson, WAOB; Alan Riffkin, FAS; Philip W. Sronce, FSA; Allen Baker, ERS.

Oilseeds: Keith Menzie, Chairperson, WAOB; Pete Burr, FAS; Mark Ash, ERS; Philip W. Sronce, FSA.

Cotton: Carol Skelly, Chairperson, WAOB; James Johnson, FAS; Scott Sanford, FSA; Whitney Rick, AMS; Leslie Meyer, ERS.

Sugar: John Love, Chairperson, WAOB; Ron Lord, FAS; Daniel Colacicco, FSA; Stephen Haley, ERS.

Meat Animals: Shayle Shagam, Chairperson, WAOB; Wendell Dennis, FAS; Milton Madison, FSA; Warren Preston, AMS; Ron Gustafson, ERS.

Poultry: Shayle Shagam, Chairperson, WAOB; Marc Warman, AMS; Todd Drennan, FAS; Milton Madison, FSA; David Harvey, ERS.

Dairy: Shayle Shagam, Chairperson, WAOB; Paul Kiendl, FAS; John R. Mengel, AMS; James Miller, ERS; Milton Madison, FSA.

Foreign Production Assessments. Preliminary foreign production assessments and satellite imagery analysis used to prepare the WASDE report are provided by the Production Estimates and Crop Assessment Division of FAS, Allen Vandergriff, Director.

Related USDA Reports. The WASDE report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the WASDE report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See <http://www.usda.gov/oce/waob/related.htm> for an explanation of related reports.

Supply and Demand Database. The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Note: Tables on pages 33-35 present a 24-year record of the differences between the October projection and the final estimate. Using world wheat production as an example, changes between the October projection and the final estimate have averaged 7.5 million tons (1.4%) ranging from -26.7 to 9.5 million tons. The October projection has been below the estimate 15 times and above 9 times.
