

## EXPORTACIÓN DE FRUTAS POR BARCO ENERO - NOVIEMBRE 2017

Continuando con nuestro anterior informe sobre lo transportado en el medio aéreo, trataremos lo transportado para exportación por el medio marítimo.

Este, sin dudas el más beneficioso para exportaciones de volúmenes considerables a menor valor de flete y el de mayor utilización históricamente.

No obstante, a través de los años se ha incrementado notoriamente la diversidad de empresas transportadoras con buques de línea que permiten el tráfico fluído a variados destinos, como así también cargar mayor cantidad de contenedores (en algunos casos duplicando su capacidad en teus), que pueden albergar las naves más modernas, la capacidad operativa de los puertos y el mayor calado de acceso y navegación.

Carlos M. Ibañez.

[Mercados de frutas.](#)
